

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

### Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

### About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

## **BIENNIAL REPORT.**

---

**1 January 1907.**

To the Forty-fourth General Assembly of Missouri:

Gentlemen: In behalf of the Board of Curators of the University of Missouri, I hereby submit (as is required by law) our biennial report, setting forth the conditions and needs of the University in detail. Reports from the following officers are included:

**Mr. J. G. Babb,**

The Secretary of the Board of Curators (at Columbia);

**Mr. Charles L. Woods,**

The Secretary of the Executive Committee (at Rolla);

**Hon. R. B. Price,**

The Treasurer of the University.

These reports show clearly the amount of money appropriated for the use of the University by the Forty-third General Assembly, the amounts received from the National Treasury from what is known as the Morrill Fund, and the collection from fees, laboratory deposits, club-house rents, and so on; and they show also how all these moneys have been spent.

Included in this volume is the report of the Board of Visitors and that of the State Board of Agriculture, both upon the condition and the needs of the University.

## DEPARTMENTS OF THE UNIVERSITY.

The University is divided into the following Departments, all of which, except the School of Mines and Metallurgy, are at Columbia:

- I. Academic Department.
- II. Teachers College.
- III. College of Agriculture and Mechanic Arts, embracing:
  - (a) The School of Agriculture.
  - (b) The Agricultural Experiment Station.
- IV. School of Mines and Metallurgy (Rolla).
- V. Law Department.
- VI. Medical Department.
- VII. Engineering Department.
- VIII. Graduate Department.
- IX. Department of Journalism.

### Historical Statement.

The legislative act establishing the public school system of Missouri was approved 9 February, 1839, and that establishing the University was approved 11 February, 1839.

The University was located at Columbia, Boone County, 24 June, 1839. The Cornerstone of the main building was laid 4 July, 1840. Courses of instruction in Academic work were begun on April 14th, 1841. A Normal Department was established in 1867, and was opened in September, 1868. In 1869 Women were admitted, first to the Normal Department, and in 1870 to the Academic Department, and soon after to all Departments. The College of Agriculture and Mechanic Arts and the School of Mines and Metallurgy were made Departments of the University in 1870—the School of Mines and Metallurgy being located at Rolla, where it was formally opened 23 November, 1871. The Law Department was opened in 1872; the Medical Department in 1873; and the Engineering Department in 1877. The Experiment Station was established, under act of Congress, 1888. The Missouri State Military School was established in 1890. In June, 1896, the Graduate Department was established by the Board of Curators. In the spring of 1904 the Department of Education was reorganized and a Teachers College created in its stead, co-ordinate in rank with the Colleges of Agriculture, Law, and Medicine. In connection with the Teachers College there have been established Elementary and High Schools in order to provide its

students with facilities for observation of and practice in teaching under the guidance of the faculty. The High School at the same time enables the graduates of two or three year high schools to come to Columbia and make up the entrance requirements of the University. Students are not admitted till they have finished the courses provided by the schools of the localities from which they come.

In October, 1906, the School of Engineering, which had hitherto been a School within the College of Agriculture and Mechanic Arts, was made a distinct Department of the University by action of the Board of Curators.

In December, 1906, the Department of Journalism was established.

In 1867 the State gave aid for the first time to the University—a sum of \$10,000. On 9 January, 1892, the main building of the University at Columbia was destroyed by fire. In the following March the legislature gave for buildings and equipment \$236,577. In March, 1893, this fund was increased by a second appropriation of \$264,000, and by \$25,000 additional for a new building at Rolla. The Thirty-ninth General Assembly appropriated \$33,000 to build an additional club house at Columbia, and the Fortieth erected the Hospital. The Forty-first General Assembly gave for buildings at Columbia \$192,000, and for the same purpose at Rolla \$87,000. The Forty-second General Assembly, in addition to appropriations for maintenance, appropriated \$184,200 for buildings and \$152,000 for equipment and improvements at Columbia, and for equipment and improvements at Rolla, \$108,000; but on account of the failure of the collateral inheritance tax only \$199,898.99, of the amount appropriated for buildings, equipment and improvements at Columbia, were paid, and of the amount appropriated for equipment and improvements at Rolla, \$50,788.14 were paid. The Forty-third General Assembly, in addition to appropriations for maintenance, appropriated for buildings at Columbia \$70,000, and for equipment and other special purposes \$159,000. For a building at Rolla \$20,000 were appropriated, and for equipment and other purposes \$63,000.

Since its foundation the University has conferred degrees as follows up to January, 1907, not including honorary degrees:

A. B. (Bachelor of Arts).....	571
B. S. (Bachelor of Science).....	209
*B. L. (Bachelor of Letters) .....	147
*Ph. B. (Bachelor of Philosophy) .....	23
*A. D. B. (Bachelor of Domestic Arts).....	7
A. M. (Master of Arts) .....	266

<b>M. S. (Master of Science) .....</b>	<b>52</b>
*M. L. (Master of Letters) .....	6
*Ph. M. (Master of Philosophy) .....	8
*A. D. M. (Master of Domestic Arts).....	1
Ph. D. (Doctor of Philosophy) .....	3
Pe. B. (Bachelor of Pedagogics) .....	153
*B. D. (Bachelor of Didactics) .....	1
*N. G. (Normal Graduate) .....	33
B. S. in Ed. (Bachelor of Science in Education).....	60
LL. B. (Bachelor of Laws).....	970
*LL. M. (Master of Laws) .....	6
M. D. (Doctor of Medicine).....	601
*B. Agr. (Bachelor of Agriculture) .....	34
*B. A. S. (Bachelor of Agricultural Science).....	13
*B. H. (Bachelor of Horticulture) .....	7
M. S. in Agr. (Master of Science in Agriculture).....	3
*M. Agr. (Master of Agriculture) .....	6
B. S. in Agr. (Bachelor of Science in Agriculture).....	31
B. S. in C. E. (Bachelor of Science in Civil Engineering).....	118
B. S. in E. E. (Bachelor of Science in Electrical Engineering).....	71
B. S. in M. E. (Bachelor of Science in Mechanical Engineering).....	41
C. E. (Civil Engineer) .....	92
*T. E. (Topographical Engineer) .....	53
M. E. (Mechanical Engineer) .....	12
B. S. in Min. E. (Bachelor of Science in Mining Engineering).....	64
B. S. in Chem. and Met. (Bachelor of Science in Chemistry and Metallurgy).....	2
Min. E. (Engineer of Mines) .....	64
Met. E. (Metallurgical Engineer) .....	2
Total number of degrees conferred .....	3,730

\*Degrees no longer conferred.

## RESIGNATIONS, APPOINTMENTS AND PROMOTIONS.

Since the publication of the last Biennial Report the following resignations, appointments, and promotions have occurred at Columbia:

### (i) Resignations.

- Jerse E. Pope—Professor of Economics.  
 W. W. Cook—Professor of Equity and Constitutional Law.  
 G. A. Bliss—Assistant Professor of Mathematics.  
 Waldemar Koch—Assistant Professor of Physical Chemistry and Pharmacology.  
 John T. Clark—Assistant Professor of Romance Languages.  
 W. L. Westermann—Assistant Professor of Greek.  
 R. B. Moore—Instructor in Chemistry.  
 Mary I. Mann—Instructor in Physical Training.  
 Wilbur F. Starr—Instructor in Vocal Music.  
 A. F. Van Deinse—Instructor in Mechanical Engineering.  
 A. C. Duncan—Instructor in Shop-work.  
 John F. McLean—Instructor in Athletics.  
 H. W. Doughty—Instructor in Chemistry.  
 C. C. Eckhardt—Instructor in History.  
 H. S. Reed—Instructor in Botany.  
 Mary E. Lewis—Adviser of Women and Head of Read Hall.  
 W. D. Chitty—Commandant of Cadets.  
 J. T. Gerould—Librarian.  
 Ethyl M. Fine—Assistant Secretary of the University.  
 C. R. Crosby—Assistant in Entomology.  
 L. R. Whipple—Assistant in English.

M. S. Bowen—Assistant in Shop-work.  
 R. M. Ogden—Assistant in Psychology.  
 Miss E. E. Dobbin—Assistant in Mathematics.  
 Charles Brooks—Assistant in Botany.  
 C. DuBois—Assistant in Anatomy.  
 Omer Denny—Assistant in Mechanical Drawing.  
 Lulu B. Woolridge—Assistant in English.  
 O. R. Gullian—Assistant in Physiology and Pharmacology.  
 C. B. Rodes—Assistant in Anatomy.  
 L. R. Burdick—Assistant in Greek.  
 L. G. Woodson—Assistant in Zoology.  
 Ruby Fitch—Assistant in Botany.  
 E. E. Brumer—Assistant in Pathology.  
 Sophie Bodenheimer—Assistant in Women's Gymnasium.  
 J. W. Widener—Assistant in Dairying.  
 H. W. Prentis—Alumni Recorder and Secretary to the President.  
 G. Wetzel—Engineer of the University.  
 Rosa Menard—Stenographer to the President.  
 Fred Kelsey—University Publisher.  
 Francis Daniels—Cataloguer in the Library.  
 Leslie E. Bates—Alumni Recorder.  
 Edith Phelps—Cataloguer in the Library.  
 Jessie M. Allen—Cataloguer in the Library.  
 Lynn Owen—Copyist.  
 G. W. Sneed—Store-keeper in Chemical Laboratory.

## (2) Appointments.

	Period.
Joseph Frazier—Professor of Military Science and Tactics.....	1 year
Jacob Kingsley Shaw—Acting Assistant Professor of Horticulture.....	1 year
Jesse H. Coursault—Assistant Professor of the Philosophy of Education.....	1 year
W. B. Elkin—Acting Assistant Professor (in charge) of Philosophy.....	1 year
Oliver D. Kellogg—Assistant Professor of Mathematics.....	1 year
M. D. Baumgartner—Acting Assistant Professor of Germanic Languages....	1 year
Frank G. Nifong—Assistant Professor of Genito Urinary Surgery and Assistant to the Surgeon in charge .....	3 months
C. C. Guthrie—Acting Assistant Professor of Physiology.....	3 months
Edna D. Day—Assistant Professor of Household Economics.....	
Wm. M. Dey—Assistant Professor of Romance Languages.....	
L. E. Bristol—Assistant Professor of Law.....	
H. L. Crosby—Assistant Professor of Greek.....	
Percy Bordwell—Assistant Professor of Law .....	
Wm. A. Miller—Assistant Professor of Railway Engineering.....	
John F. McLean—Instructor in Athletics.....	
Lewis Ingold—Instructor in Mathematics .....	
A. G. Reed—Instructor in English.....	
A. H. R. Fairchild—Instructor in English .....	
Caroline McGill—Instructor in Anatomy .....	
J. L. Compartetie—Instructor in Latin .....	3 months
Howard V. Canter—Instructor in Latin .....	
Howard W. Doughty—Instructor in Chemistry .....	
W. D. A. Westfall—Instructor in Mathematics.....	
Helen M. Evers—Acting Instructor in Romance Languages.....	1 year
Fritz Krull—Instructor in Vocal Music.....	
R. L. Borger—Instructor in Mathematics.....	
A. E. Grantham—Instructor in Agronomy .....	1 year
Truman Michelson—Acting Instructor in Latin .....	1 year
M. S. Bowen—Instructor in Shop-work.....	
Elizabeth Holmes—Instructor in Physical Training.....	1 year
Elizabeth Bedford—Instructor in Romance Languages.....	1 year
E. A. Fessenden—Instructor in Mechanical Engineering.....	
Murry S. Wildman—Instructor in Economics.....	
W. S. Cummings—Instructor in Athletics.....	4 months

Thos. J. Riley—Instructor in Sociology .....	
W. J. Monilaw—Instructor in Athletics.....	
Florence Alden—Instructor in Athletics (for women).....	
J. W. Putnam—Instructor in Political Science and Economics.....	1 year
S. D. Gromer—Instructor in History and Economics.....	1 year
C. C. Crawford—Instructor in History.....	1 year
Geo. R. Mansfield—Instructor in Geology.....	
Homes L. Shantz—Instructor in Botany .....	
Marlow A. Shaw—Instructor in English .....	
R. E. Spencer—Instructor in English.....	1 year
H. D. Carpenter—Instructor in Electrical Engineering.....	1 year
Chas. O. Collett—Instructor in Electrical Engineering.....	1 year
A. H. Welch—Instructor in Mechanical Drawing.....	1 year
L. H. Gale—Assistant in Veterinary Science.....	3 months
Mary S. Walker—Assistant in Mathematics.....	
Stanley Sisson—Assistant in Experimental Psychology.....	
C. B. Rodes—Assistant in Anatomy .....	
R. E. A. Bonnot—Assistant in Anatomy.....	
J. R. Wharton—Assistant in Mechanical Engineering.....	
Leslie M. Fry—Assistant in Surveying .....	
E. V. Vaughn—Assistant in History .....	1 year
D. W. Richards—Assistant in Dynamo Laboratory.....	1 year
Howard Welch—Assistant in Zoology .....	1 year
Ruby Fitch—Assistant in Botany .....	1 year
Mary A. Lamb—Assistant in Education (Primary teacher in T. C. Schools) .....	1 year
George W. Tannreuther—Assistant in Zoology .....	
E. F. Robinson—Assistant in Mechanical Drawing.....	1 year
Bayard F. Floyd—Assistant in Botany.....	1 year
Ell S. Haynes—Assistant in Mathematics .....	1 year
J. O. Barnwell—Assistant in Shop-work.....	1 year
F. W. Liepsner—Assistant in Agricultural Chemistry.....	1 year
W. K. Seitz—Assistant in Surveying .....	5 months
Clyde Brooks—Assistant in Physiology .....	1 year
R. F. Jarvis—Assistant in Shop-work.....	5 months
Earl L. Bradsher—Assistant in English .....	
Carter Alexander—Assistant in Education (Principal of Teachers College High School) .....	
H. H. Thurston—Assistant in Education (Assistant in Teachers College High School) .....	
H. E. Howe—Assistant in Physics .....	
Harry S. Wayman—Assistant in Dairying .....	
Leonard Haseman—Assistant in Entomology .....	
Margaret Sinclair—Primary Teacher in Teachers College School.....	1 year
Ella Burk—Teacher in Intermediate grades Teachers College School.....	1 year
E. L. Driggs—Assistant in Civil Engineering.....	1 year
W. H. Chandler—Assistant in Horticulture .....	
L. F. Childers—Assistant in Agronomy .....	1 year
R. W. Clothier—Assistant in Agronomy .....	
Edwin Trowbridge—Assistant in Animal Husbandry .....	
F. V. Emerson—Assistant in Geology .....	
Ernest Horn—Principal of Elementary School of Teachers College.....	1 year
W. S. Pemberton—Assistant in Mathematics .....	1 year
P. T. Hedges—Assistant in Mathematics .....	1 year
D. W. Swiggett—Assistant in English .....	1 year
Caroline B. Benton—Teacher in grammar grades (Teachers College Elementary School) .....	
Edith Parker—Assistant in Manual Training .....	1 year
W. W. Edwards—Assistant in Mechanical Drawing.....	1 year
R. C. Doneghue—Assistant in Agronomy .....	
B. R. Thompson—Assistant in Dairying .....	

(3) Promotions, Changes in or Additions to Titles, etc.

J. C. Whitten—Tutor to the University .....
H. B. Almstedt—Professor of Germanic Languages.....
O. M. Stewart—Professor of Physics .....

N. M. Trenholme—Professor of History.....	
W. L. Westerman—Assistant Professor of Greek.....	
Herman Schlundt—Assistant Professor of Physical Chemistry.....	
Caroline T. Stewart—Assistant Professor of Germanic Languages.....	
John S. Ankeney, Jr.—Assistant Professor of Free-hand Drawing.....	1 year
J. C. Jones—Acting President .....	
J. L. Merriam—Professor of Theory and Practice of Teaching.....	
Jonas Viles—Professor of American History .....	
F. P. Spalding—Junior Dean of the Engineering Department.....	1 year
C. C. Eckhardt—Instructor in History.....	
W. G. Brown—Professor of Chemistry and Director of Laboratories.....	
Frank P. Graves—Assistant Dean of the Academic Department.....	1 year
V. H. Roberts—Professor of Real Property and Corporations.....	
W. W. Cook—Professor of Equity and Constitutional Law.....	
F. P. Graves—Acting Dean of the Teachers College.....	5 months
M. S. Wildman—Assistant Professor of Economics.....	
H. M. Belden—Professor of English Language and Literature.....	
Sidney Calvert—Professor of Organic Chemistry.....	
C. H. Eckles—Professor of Dairy Husbandry .....	
T. J. Rodhouse—Assistant Professor of Mechanical Drawing.....	
Paul Schweitzer—Professor of Agricultural Chemistry.....	
F. P. Graves—Director of the Daily Assembly.....	1 year
A. M. Greene, Jr.—Junior Dean, Engineering Department.....	1 year
F. B. Mumford—Professor of Animal Husbandry—in charge of Animal Husbandry Department in the Experiment Station.....	
L. D. Ames—Assistant Professor of Mathematics.....	
Alan E. Flowers—Assistant Professor of Electrical Engineering.....	
C. M. Jackson—Junior Dean of Medical Department .....	
R. M. Bird—Acting Professor of Agricultural Chemistry.....	
A. H. R. Fairchild—Assistant Professor of English.....	

### THE FACULTY.

In administering the affairs of the University one thing challenges the most serious consideration. Changes in the Faculty should never take place except for undoubtedly good reasons. Changes are often inevitable because of our inability to retain in the service of the University the best qualified teachers. Other more favored institutions, with ample resources at command, frequently take from us experienced, thoroughly trained men. The loss thus sustained in late years has been incalculable. The retention of valuable men is all-important. Enlarged resources should be placed at the command of the Board, enabling us to compete with any institution in the country in securing and retaining the best talent for our University. A great State like Missouri cannot afford to cripple the work of its University or diminish the opportunity of the youth of the commonwealth. Only by supplying in the Faculty teachers of the best ability can we attract the young men of Missouri to the University and prevent them from leaving home to find higher advantages elsewhere.

The salaries paid in our University are relatively low. The stronger Universities all pay larger salaries. If we are to retain our best Professors it is necessary that they should receive somewhat

larger salaries. It is idle to say that good men are easy to get. Experience shows that it is very hard to get thoroughly good men. Every time that a good Professor leaves we incur the immense risk of getting a weaker man in his place. It is wise policy when we have secured a thoroughly good Professor to hold him if a few hundred dollars more of salary will do it.

### THE STUDENTS.

**Growth of College Spirit.** One thing that has pleased the friends of the University greatly during recent years has been the remarkable growth of good college spirit among our students. They have manifested on many occasions, and in a variety of ways, evidences of unselfish interest in the good of the University. The importance of the growth of true college spirit cannot be over-estimated, for education in any institution is a failure unless it sends its students forth with a good spirit towards the institution itself, towards the State, the nation, their fellowmen, and their God. Many things have contributed toward the growth of this college spirit among the students, notably Athletics, the Young Men's Christian Association, and the Daily Assembly.

**Intercollegiate Debates.** The students of the University, we are proud to say, have proved themselves good debators in contests with other educational institutions, having been successful in the majority of the debating contests arranged with neighboring universities during the last ten years.

**Paying One's Own Way.** A number of students manage to pay their way at the University by their own exertions. Some of the most distinguished men in Missouri and other states have done this in former years. The number of such students in the present session 1906-7 is large. The Young Men's Christian Association, a student organization, maintains an Employment Bureau, making a canvass of the town for work every fall. Too much praise cannot be given to this body of Christian students and to the teachers and officers of the University for the encouragement they have given to poor young men in supporting themselves. In this connection we ask for a small appropriation in the next biennial period of \$10,000 for student labor in the offices, on the farm, and on the campus. This will enable the University to help worthy students by paying them about fifteen cents an hour.

**Religious Organizations.** Two years ago the old chapel service, which was held in the Library early each morning, and consequently

was poorly attended, was discontinued. In place of this, a daily assembly, thirty minutes in length, is held at a suitable hour in the morning. Exercises are held in the Auditorium. Attendance upon them is voluntary, but a large number of the student corps is attending them. Many of these exercises are religious in character, but on other occasions the main feature of the exercises is a talk, generally by some member of the faculty, upon some topic of interest. College spirit is fostered to a large extent by these daily meetings of the whole student body.

The object of the Young Men's Christian Association, which dates its existence in the University from January 18, 1890, is the same as it is in other institutions of learning, namely, the union of Christian students in Christian work. For the last six years the Association has been rapidly growing in strength until now it is the largest college association in the State. A General Secretary is employed who gives all of his time to this work. Its membership is composed of men representing all phases of University life, Oratory, Athletic, Debating, Journalism, Music, etc.

A meeting is held every Sunday afternoon in the University Auditorium, addressed by students, professors, and prominent men from Columbia and other cities. This year over 200 men have met weekly in Bible classes led by students. About 30 men meet each week to discuss foreign missions.

The Association owns the lot situated immediately in front of the University Campus, and a suitable Y. M. C. A. student building is now in course of construction on it. The faculty, alumni, students, and friends of the Association have given liberally to the building fund, and though there has not yet been raised a sufficient sum to complete the building, it is hoped that this movement will be crowned with success before the end of this year. A state university is a strategic point for religious work, and there are few ways in which one could better use money than in giving it for the erection and equipment of this building.

At the beginning of each scholastic year, a committee from the Y. M. C. A., to be recognized by their badges, meets students at the trains and renders them assistance in securing board, introduces them to friends and to officers of the University, and performs various other acts of kindness. A letter sent in advance to the General Secretary of the Y. M. C. A., Columbia, Missouri, will receive prompt attention.

An Employment Bureau is maintained for the purpose of securing work for those students who find it necessary to work their way

through the University. A canvass is made of the town people each fall and work is distributed to as many worthy students as possible. In this session work netting about \$4,000 is being distributed in this way. The Bureau guarantees no one a position, but tries to help all who apply. Those who desire help of this kind should write to the General Secretary before coming to Columbia.

The Young Women's Christian Association is growing at a most gratifying rate in enrollment and in efficiency. The members are beginning to learn, as the young men have already done, that Christian life of a high type cannot be maintained by prayers alone. Indispensable is Christian work for the benefit of others. For the first time in the fall of 1904, this association was able to secure the entire time of a Secretary.

**Societies and Publications.** There are connected with the University at Columbia several societies for students: "The Graduate Club"; "The Athenean"; "The Union Literary"; "The Bliss Lyceum"; "The Medical Society"; "The Agricultural Club"; "The Engineering Society"; "The M. S. U. branch of the American Institute of Electrical Engineers"; "The M. S. U. Debating Club"; "The New Era Debating Club"; "The German Club"; "The English Club"; "The Folklore Society"; "The German Dramatic Club"; "The French Dramatic Club"; "The Sketch Club"; "The Zoological Field Club"; "The Mens' Glee Club"; "The Ladies' Glee Club"; "The Missouri University Gymnastic Society"; "The Y. M. C. A."; "The Y. W. C. A."; "The Cadet Band," and others. These societies hold meetings for improvement in debating, declamation, oratory, composition, language work, scientific study, music, or religion, and form an important means of culture.

"The Independent," published weekly by the students of the University, is one of the best college papers in the West. Students of the College of Agriculture publish a monthly paper called the "Missouri Agricultural Farmer," which is quite a credit to the college. The "Savitar" is published annually by the Junior Class. "The Engineering Quarterly," published by the Engineering Society, and "The Alumni Quarterly," published by the Alumni Association, are new magazines that take high rank among University publications.

**Co-operative Store.** To protect the students from unreasonable charges for books, stationery, etc., the University established several years ago in two rooms of Academic Hall a Co-operative Store. Several students help to keep this store, receiving for their services small salaries. The profits are divided among the purchasers. No one receives any profit except he be a student of the University and a

purchaser in the store, and his profit is in proportion to his purchase. The Store sells to the University people only, refusing to sell to the people of the town. It has saved the students in the last biennial period a large sum of money. It was established with the consent of the Curators and has been heartily commended by the Board of Visitors. No officer or teacher in the University is interested in this store except through his interests in the students.

**Cadet Uniforms.** In the Militia appropriation \$7,500 should be given to uniform the Cadets of the University. The appropriation made by the Forty-third General Assembly was insufficient, and a levy upon the cadets was found necessary in order that all might appear for drill in appropriate uniforms. Even if the number of Cadets shows no increase during the next two years, which is very unlikely, the amount asked for will be barely sufficient to cover the cost of necessary uniforms. It should also be provided that of the amount appropriated only half can be drawn in the first year. Band instruments are also much needed at present.

**Women in the University.** Every department of the University is open to women on the same conditions as to men. The first honors have frequently been won by women.

**Rooms for Women.** The women of the University have set apart in Academic Hall a suite of rooms for their special enjoyment and use. These rooms are strictly private. They are presided over by a Matron who does nothing but exercise motherly care over the young women. They are kept in beautiful order by an Assistant Matron.

**Dormitory for Women.** In the summer of 1903 Read Hall, the dormitory for women, was furnished, and in September of that year it was formally opened. In its furnishings an earnest effort was made to keep out everything that savored of show or of extravagance, but an equally earnest effort was made to furnish it with exquisite taste and judgment. Since it has been opened every room has been occupied, and there has always been a list of young women waiting for possible vacancies.

Miss Mary B. Breed, the Adviser of Women in the University, is the Head of Read Hall. Her duties are to advise and aid in every possible way all the young women students who attend the University, especially in selecting rooms, and as to health and manners.

**Enrollment.** The enrollment in the Departments at Columbia and at Rolla has been very large in the biennial period just closed. At present it is more than 25 per cent greater than two years ago. It is now assured that, unless something unforeseen happens, the enrollment at Columbia will reach, by the close of the present session,

nearly 2,200 students, while that at Rolla will reach 200 more, making a total in the whole University of about 2,400. It is confidently expected that this enrollment will reach 2,700 next session and that the Forty-fifth General Assembly will find by June, 1909, at Columbia and at Rolla combined, fully 3,000 students. In the session of 1905-6, 2,072 students were enrolled in all Departments, representing 57 states, territories, and foreign countries. One hundred and six out of 114 counties in Missouri were represented here last year.

**Missouri Students in Other States.** Being curious to know to what extent Missouri students are being educated in other states, the Registrar of the University two years ago ascertained the attendance from Missouri at the following Institutions—Harvard, Yale, University of Chicago, Columbia, Cornell, Princeton, Johns Hopkins, University of Virginia, Washington and Lee, Vanderbilt, the Universities of Texas, Kansas, Nebraska, Wisconsin, Michigan, and at Vassar, Wellesley, Bryn Mawr, Smith, and Monticello Colleges. This makes a total of twenty institutions. Six hundred Missourians, men and women, were found in these twenty institutions. It is fair to suppose that there are perhaps as many more Missourians in other institutions which the Registrar has not examined. Let us be conservative and say that there are 400 more in all the institutions of our country not above enumerated. This makes a total of 1,000. Now most of these institutions are expensive. It is fair to say that on an average each of these students is spending \$500 a year outside of Missouri. This is \$500,000 a year or for the biennial period \$1,000,000 of Missouri money spent at institutions of other states. Our State has at some periods in the past pursued the suicidal policy of starving her own University and forcing her students to go elsewhere for the education that they should receive at home.

On the other hand, Michigan has fostered her University from its foundation to the present time. There are enrolled at Ann Arbor from other states about 1,500 students. It is fair to suppose that each of these students spends in Michigan at least \$333 a year for tuition, clothes, board, incidental expenses, books and other student supplies. It will be seen that the 1,500 students from other states bring to Michigan \$500,000 a year. Michigan levies for her University each year two and one-half cents on every \$100 or five cents a \$100 for the biennial period. If Missouri taxed herself at the same rate this would produce (on an assessed valuation of \$1,389,000,-000) \$694,500 for the biennial period. Michigan provides richly for her University and therefore brings from other states \$500,000 a year. Missouri has often provided for her University inadequately and

forced her people to pay other states for the education of her children half a million a year. The difference between the two systems is a million a year or two millions for a biennial period.

### THE UNIVERSITY AND THE PUBLIC SCHOOLS.

**Summer Session.** During the summers of 1905 and 1906 a Summer Session of the University has been held in Columbia for one term of two months, and courses have been given in Agriculture, Botany, Civics, Chemistry, Economics, Education, Elocution, English, Freehand Drawing, French, German, Geology, Latin, Music, Philosophy, Physics, Physiography, Sociology and Zoology. In two years the enrollment in the Summer Session has been 800. All these teachers, taught in our Summer Session, are teaching with better instruction children in the public schools of Missouri every winter; this good work goes on so long as these teachers continue in their profession. Moreover, the process is repeated annually on an increasing scale. In 10 years as many as 4,000 students, mostly teachers, have attended our Summer Schools. The uplifting of these teachers lifted higher hundreds of thousands of children.

**Growth of Accredited High Schools.** The growth of our accredited high schools has been remarkable. The number is now 147 (125 in Missouri) and perhaps 50 more are seeking places on our list. Fourteen years ago there were not six secondary schools, public or private, in Missouri that could have met our present conditions for approval. Nine-tenths of those that are accredited are public schools. With the growth of these schools in quality comes a corresponding growth in enrollment. Many of them have increased their enrollment 100 per cent in the last six years. It should be remembered that this marvelous growth of high schools has been largely the work of the University, whose influence should not be measured by its own enrollment alone but by its influence on the public schools as well. Thousands of students that do not come to the University are receiving a far better education than would have been possible to them had not the influence of the University reached their local high schools. As the standards of the high schools are advanced, the district schools are necessarily greatly improved. Thus the influence of the University in upbuilding high schools cannot be over-estimated in the good which it has done for the whole educational system of the State.

**State Aid to High Schools.** It would be a Godsend to education in Missouri if in some way the State would give stimulative aid to

high schools in counties that really need aid. If it be allowed us to make suggestions to the General Assembly, we would respectfully offer the following:

(1) State aid should not be extended to a high school situated in a school district that is able to support a high school of its own—say in a district in which the assessed valuation of property is a million dollars or more.

(2) State aid should not be offered to a high school in a district in which the people are taxing themselves for school purposes less than seventy-five cents on the hundred dollars. To those who tax themselves in this sum the State might well offer \$300 or \$400, this minimum amount being increased where the rate of taxation is eighty cents on the hundred dollars, and again increased where it is eighty-five cents on the hundred dollars, and so on up to a dollar.

(3) To encourage three or more school districts to unite for the support of a common high school as provided for in an existing statute, a fixed amount of State aid might be offered without reference to the assessed valuation of property. There would be no danger that rich districts might unite with poor districts and thus profit by State aid, for the loss to a rich district by uniting with two or three poor ones would be greater than the aid received. The State could well afford to put a premium upon such a union of rural districts for the maintenance of a common high school.

(4) It might well be specified that where State aid is extended to any high school the teaching shall gradually become industrial as well as literary and scientific. Any high school profiting by State aid might well be required to give in time instruction in Agriculture, Horticulture, Entomology, Mechanic Arts, and Domestic Economy, as well as in the subjects usually taught in first-class high schools. The richer portions of Missouri can well afford in their own interest to lift up education in the poorer sections.

In this connection let me point to the admirable results achieved in Minnesota and Wisconsin by stimulative State aid to high schools. Every foot of soil in Missouri should belong to some high school district as well as to some elementary school district as is the case now. In many parts of the State the whole country should form a high school district.

## **THE COLLEGE OF AGRICULTURE AND THE EXPERIMENT STATION.**

**State Soil Survey.** The most important new line of work undertaken by the College of Agriculture is the State Soil Survey. Mis-

souri's greatest mineral wealth is the plant food contained in her soil. To so shape the system of farming as to enable this soil to produce profitably without being mined out is the greatest problem now confronting our people. It is of fundamental importance to define accurately the various types of soil in the State, and so study their chemical composition and physical characteristics, and their application to various plants, to crop rotations and to different systems of farming. All of this the Soil Survey scheme embraces. Samples of these soils have been analyzed, and their origin and previous history carefully studied. In addition, definite field experiments have been located on the principal soil types which seemed most urgently in need of assistance, for a determination of the particular fertilizers, renovating crops, and systems of rotation which would produce the greatest economic results. At the present time ten such experimental fields have been located, as follows: Monroe City, Monroe County; Unionville, Putnam County; Billings, Christian County; Purdy, Barry County; from all of which we have already two years' results. The experimental fields established in the spring of 1906 from which we have only one year's results are at Lamar, Barton County; Adrian, Bates County; Cuba, Crawford County; Dixon, Pulaski County; Poplar Bluff, Butler County. In addition to these general experimental fields, we have established experiments to ascertain the cost, feasibility and profitableness of title drainage for certain areas in the State. Drainage fields have already been established at Lamar, Barton County, and at Monroe City, Monroe County; and the arrangements are practically completed for experiments of this character at Popular Bluff, Butler County; at Centralia, Boone County; and at Trenton, Grundy County.

It is hoped that the Legislature may provide sufficient funds to more than double the number of experimental fields and greatly increase the force engaged in this work.

**Fertilizer Law.** Under the Fertilizer Laws recently enacted, all the fertilizers sold in this State have been registered in the office of the Director of the Experiment Station, and samples of these fertilizers have been collected in the open market and analyzed by the Station. Each package of fertilizer is required to be marked with its guaranteed chemical composition, and a tag furnished by the Director must be affixed indicating that the brand in question has been duly registered according to the law. This law has proved highly satisfactory to the farmers and to the reputable manufacturers of the State.

**Pure Food Law.** There should be a similar law governing the sale of feed stuffs for livestock. Practically all of the states in the Mississippi Valley except Missouri have such a law, with the result that Missouri is being made the dumping ground for all of the adulterated, spurious and worthless feeds which have been driven out of these states by the rigorous enforcement of their laws. Our farmers, stockmen, and citizens in towns and villages who keep horses and cattle are thus made to suffer the penalty of our own neglect in this important matter.

It is likewise true that the Missouri market is open for the foods and drugs intended for human consumption which are so adulterated, misbranded, or are so deleterious to public health as to have been excluded from the markets of surrounding states, having such laws. The control of this matter as well as that of the stock foods should be placed in the hands of the Experiment Station.

**Co-operation with the United States Government.** The United States Department of Agriculture has materially increased its lines of co-operation with the Experiment Station. In addition to the very extensive co-operative cattle feeding experiment which has been in progress here during the last four years, the Government has recently established a dairy research laboratory, for a most elaborate study of the chemical composition and physical characteristics of milk produced under various conditions and with various breeds of cattle in their relation to its value as a human food. Already one chemist is stationed here to conduct this work under the direction of the head of the Dairy Department of the University, and two assistants are expected to be detailed in the very near future.

**Co-operation with the Farmers of Missouri.** The co-operative experiments with farmers, particularly in the testing of the varieties of corn and wheat in different localities of the State, have been greatly enlarged and strongly emphasized.

Four important experiments with bearing orchards have been established as follows: At Sunlight, Washington County, on apples and peaches; at Dixon, Pulaski County, on apples and peaches; at Goodman, McDonald County, on apples and peaches; at La Plata, Macon County, on apples.

The Station is directing hundreds of experiments in different parts of the State with alfalfa, new grasses, and various forage plants.

**Farmers' Institute.** The Station staff continues to attend the farmers' institute held under the auspices of the State Board of Agriculture whenever their duties here will permit. This is a most excellent opportunity for them to bring directly to the attention of a

large number of farmers the concrete results of their investigations and studies.

**Bulletins and Circulars.** A list of the bulletins published by the Station since the last biennial report is as follows:

(a) **Bulletins.**

No.	Name.	Pages.	Copies.
65.	Grain Rations for Dry Lot Hog Feeding.....	92	10,000
66.	Analyses of Commercial Fertilizers.....	8	1,000
67.	Supplements to Corn for Fattening Hogs.....	19	10,000
68.	I. A Test of Tin Can Separators. II. A Test of Fly Repellants..	19	10,000
69.	Three Fungous Diseases of the Cultivated Ginseng .....	26	5,000
70.	Analyses of Commercial Fertilizers.....	11	10,000
71.	The Fruit-tree Leaf-roller .....	21	10,000
72.	Alfalfa Growing in Missouri.....	52	15,000

(b) **Circulars of Information.**

No.	Name.	Pages.	Copies.
17.	The Planting and Care of Shade Trees.....	16	3,000
18.	The Farmers' Creamery in Missouri. When and How to Build..	21	1,000
19.	Suggestions for Missouri Corn Growers.....	27	10,000
20.	Directions for Making Bordeaux Powder.....	4	10,000
21.	Some Fungous Diseases and Their Treatment.....	12	10,000
22.	Feeding the Orchard .....	32	500
23.	Fungicides, Insecticides and Spray Calendar.....	19	10,000
	Public School Bulletin No. 2. The Principles of Plant Production.		
	The Seed (revised) .....	44	5,000
	Public School Bulletin No. 3. The Falling of the Leaves.....	18	5,000
	Annual Report for 1904 .....	8	200

**State Bureaus and Commissions at Columbia.**

Every department of the State Government which has for its object scientific, philanthropic, or statistical work should have an office in the University at Columbia. Free quarters should be given to such Bureaus and Commissions in the buildings of the University. They should have easy access to its Libraries and Laboratories. Their officers might sometimes lecture before our students. They should co-operate with the allied Departments of the University and receive help from them.

The friendly co-operation between the College of Agriculture and the State Board of Agriculture, whose offices are by law in the Agricultural Building of the University, furnishes a striking example of the benefits to both parties from such intimate association.

In our Engineering building should be located any Bureau or Commission that may be established for Good Roads. With a Road Laboratory and a trained corps of workers, a Commission or Superintendent could efficiently work out many of the problems presented in the State.

The State Board of Charities and Corrections might well be quartered in our Academic Hall, close to our departments of Political Economy and Sociology, which should receive aid from it and give aid in return.

The State Fish Commission should have a station at Columbia River connection with our department of Biology and our Experiment Station. We could render it valuable aid and receive aid in return.

### **The Federal Government and the University.**

As noted above, the United States Government, through its Department of Agriculture, has of late materially increased its line of co-operation with our Agricultural Experiment Station. A very extensive co-operative cattle feeding experiment has been in progress during the last four years, and the Government has recently established a dairy research laboratory for a most elaborate study of the chemical composition and physical characteristics of milk produced under various conditions and with various breeds of cattle in relation to the value of milk as a human food. Already one chemist is stationed here to conduct this work under the direction of the head of the Dairy Department of the University, and two assistants are expected to be detailed in the very near future. An extensive and important piece of research, in co-operation with the Department of Agriculture at Washington, has also been in progress for several years on the propagation of mushrooms. The work continues under the direction of the Department of Botany of the University.

The United States Fish Commission is co-operating with the Department of Zoology here in an investigation concerning the artificial propagation of fresh water shells, and with the Department of Physiology on the physiology of salmon during their migration. The latter investigation is conducted every summer in the Columbia River.

The National Academy of Sciences has also recently authorized important researches to be carried on by our Department of Astronomy.

### **What Other States Do for Their Universities.**

In a number of States the maintenance and support of the State University is obtained by means of a tax on all the property in the State. Except by amendment of the statutes, the Legislature has no power to increase or diminish this sum of money. In such states the University appeals to the Legislature for buildings, books, and equipment.

ment, but its maintenance and support are fixed by law. Twelve States have adopted this method. Sooner or later, Missouri and every other State that has a University will adopt the same method. The rate of taxation in each of these states is given below. It is easy to estimate what the revenue of our University would be under a similar tax, if we place the valuation of property in Missouri at \$1,389,000,-000.

Colorado, for example, levies a tax of four-fifths of a mill for the support of three institutions, all of which are embraced in the University of Missouri. A similar tax in Missouri would yield a million a year.

Nebraska levies a tax of a mill a year for her State University. A similar tax in Missouri would yield \$1,389,000 per annum.

Even at the conservative rate in Michigan, we should get annually \$347,250 for the University and \$100,000 more for the College of Agriculture. The rates for the 12 States are as follows:

Arizona—Three-fifths mill tax for the University of Arizona.

California—One-fifth mill tax for the University of California.

Colorado—Two-fifths mill tax for the University of Colorado; one-fifth mill tax for the State School of Mines; one-fifth mill tax for the State Agricultural College.

Indiana—One-tenth mill tax for Indiana University; one-tenth mill for Purdue University.

Kentucky—One-twentieth mill tax on the property of the white people for the Agricultural and Mechanical College of Kentucky.

Michigan—One-fourth mill tax for the University of Michigan; one-tenth mill tax, but not to exceed \$100,000, in any one year for the State Agricultural College.

Minnesota—Twenty-three one-hundredths mill tax for the University of Minnesota.

Nebraska—One mill tax for the University of Nebraska.

North Dakota—Two-fifths mill tax for the University of North Dakota; one-fifth mill for the North Dakota Agricultural College; three one-hundredths mill tax for School of Forestry.

Ohio.—Fifteen one-hundredths mill tax for Ohio State University; seven two-hundredths mill tax for Ohio University; one-fortieth mill tax for Miami University; one one-hundredth mill tax for Wilberforce University.

Wisconsin—Two-sevenths mill tax for the University of Wisconsin.

Wyoming—Three-eighths mill tax for the University of Wyoming.

In 1903 the State of California, in addition to the regular levy, appropriated \$100,000 for the maintenance and support of the State University for each of two years. In 1904 Kentucky passed an act granting to the Agricultural and Mechanical College \$15,000 annually, in addition to the amount derived from the tax levy.

Alabama grants to the Alabama Polytechnic Institute one-third of the net proceeds arising from the sale of fertilizer tags, and South Carolina grants to Clemson Agricultural College the entire proceeds of the fertilizer tax.

The following states have made permanent provision for their Normal Schools also:

Colorado—One-fifth of a mill for the State Normal School.

Indiana—Three-fortieths of a mill for the State Normal School.

North Dakota—Twelve one-hundredths of a mill for the Normal School at Valley City, and twelve one-hundredths of a mill for the Normal School at Devil's Lake.

Wisconsin—State tax for seven Normal Schools, which tax is fixed since 1903 at \$230,000 a year.

It is not our business to advertise the glories of other states and other universities, but it is our duty to tell our own people plainly that if good provision is not made for this University the youth of Missouri must receive at home inferior educational advantages, or must go over the border of this commonwealth to universities that are liberally supported by other states. Kansas, Wisconsin, and Illinois are very close, and Lincoln, Nebraska (the seat of the University), is within two hours' ride of the northwestern border of Missouri.

A distinguished Missourian has well said: "Somewhere in the Southwest, and in the near future, a splendid University will rise—one that will shine resplendent above all rivals. Illinois, Iowa, Kansas, Nebraska and Texas are all fighting for this distinction. When success is once achieved it will be hard to wrest the laurel from the victor. Unquestioned supremacy once obtained is apt to be permanent. Missouri holds the key to the situation, and, if we but utilize our advantage, we can win the prize. If we are to succeed, the people must take hold of the University with a firm but affectionate hand and lift it right up beyond the reach of danger, and send it forward with that confident strength that overwhelms opposition and makes victory sure."

**Report on Special Appropriations Made by the Forty-Third General Assembly.**

I. Summer Session . . . . . \$12,000

The entire appropriation has been expended in the maintenance of the Summer Session of 1905 and 1906. No branch schools were conducted during these years, but the work at Columbia was strengthened by offering a greater variety of subjects and more advanced courses in Education and in Academic subjects to enable teachers of the State to satisfy their needs without going to Chicago and other summer schools outside of Missouri.

II. Libraries . . . . . \$20,000

A considerable sum has been expended from the appropriation in payment of salaries of the regular staff, of cataloguers, night librarian, and some others employed for special work. The balance was used in the purchase of books. About 5,000 volumes have been purchased and catalogued.

III. Laboratories . . . . . \$10,000

The amount has been expended on more than twenty laboratories of the University, each one of which has to maintain several divisions of scientific work and involves the use of several rooms. Although the amount was spent to good advantage, it was altogether inadequate to maintain the laboratories in good condition and made no provision for growing needs. A very much larger appropriation is urgently needed.

IV. Maintenance and Improvement of Parker Memorial Hospital . . . . . \$10,000

The total amount of this appropriation together with the ordinary income from patients, has been expended for the maintenance of the Hospital. The Hospital could be made self-supporting, or nearly so, by lowering the quality of service; or if there were one hundred beds, and all well filled, we could maintain the present admirable service and pay expenses; but under present conditions this is impossible. The enormous value of this Hospital to sick students makes it a matter of great importance to the State that it be maintained at a high standard of efficiency.

V. Student Labor ..... \$6,000

Labor on the College Farm and Horticultural Grounds, clerical work in the offices of administration and in the publisher's room, and sundry other items of work in the buildings and on the grounds of the University have been given to students, both men and women. This has been very helpful to students who are in need of help.

VI. Fellowships and Scholarships.....\$4,000

Graduate students from this and other Universities and colleges have been appointed to fellowships and scholarships, the former receiving \$250 a year and the latter \$150. The full amount has been expended.

VII. Publications and Advertising.....\$5,000

The money has been expended in judicious advertising in Missouri newspapers, in sending out University bulletins, and, generally speaking, in efforts to give the public correct information concerning the advantages and the usefulness of the University.

VIII. Gymnasium for Men.....\$50,000

The amount has been expended in completing the Gymnasium for men, known as the G. F. Rothwell Gymnasium, making the total cost of the building about \$65,000. It is a beautiful building, 100 x 142 feet in size, built of free stone, and containing offices, class rooms, trophy rooms, bath rooms, lockers, etc., as well as the main gymnasium floor space, 92 x 96 feet in size. It is admirably adapted to its purpose and is considered by expert judges the best building of its kind in the country for the money spent. It provides the University for the first time with suitable quarters for instruction in physical training.

IX. Grading, Granitoid and Fences.....\$2,000

This amount has been spent in constructing a granitoid sidewalk along the east side of the Campus, some walks inside the Campus, and on grading within the campus.

X. Benton Hall ..... \$15,000

This money has been expended in the complete renovation and furnishing of Benton Hall, the oldest Dormitory for men. It has been made quite satisfactory as a home for men.

XI. Heat, Light and Power Plant.....\$18,700

This amount was expended on the purchase of land connecting the University campus with the M., K. & T. railroad, for \$4,500, and on extensive improvements in the Light and Power Plant. The land purchased will be used later as a site for a much larger heating and power plant than the present, one which will serve as a central heating plant for all the buildings of the University. Tracks have been laid on this land, connecting the campus with the M., K. & T. railroad, so that coal can be handled by car-loads, instead of by wagon-loads, as has been the case heretofore.

XII. Engineering Department.....\$15,000

This sum has been expended in the purchase of equipment and for salaries of new instructors, whose appointments were made necessary by the great increase of enrollment during the biennial period.

XIII. Law Department.. ....\$3,000

This appropriation was used for improvements in the Law Building for the purpose of accommodating the Law Library to the increased number of students. Additional Library rooms on the first floor were obtained by fitting up three rooms in the basement for lavatory and cloak rooms.

XIV. College of Agriculture and Experiment Station .....\$50,000  
Completion of Cattle Barn.. .....5,000

The amount appropriated for the Cattle Barn has been expended in its completion and it is now in use.

The additions to the teaching and experimental force reported under the head of Promotions, Additions to Faculty, etc., have been made out of this appropriation. The sum of \$3,000 was devoted to the erection of a plant house for instruction and research in plant physiology for the Department of Botany. The Soil Survey work referred to under the head of "College of Agriculture and Experiment Station" has been placed on a good basis, and already much valuable information has been collected which it is expected to incorporate in a preliminary report soon to be issued. In addition to the experimental fields established in ten different counties in the State, from some of which two years' results have already been obtained, nearly 200 samples of soil from 43 counties have been collected, 75 of which have already been submitted to chemical analysis, and 100 have been put through the routine of physical analysis. The soils already analyzed have been taken from the following counties: Barry, Barton, Bates, Cape Girardeau, Cass, Cedar,

Christian, Crawford, Dent, Dunklin, Franklin, Gasconade, Hickory Jefferson, Johnson, Lawrence, McDonald, Maries, Morgan, Nodaway, Pemiscot, Phelps, Polk, Pulaski, Reynolds, Saline, Shannon Texas, Vernon, Washington, Wright.

So far this survey has been general and has dealt only with the principal soil types. A beginning, however, has been made upon the detail work, and a portion of Barton county finally completed

The Farm Machinery Laboratory provided for is a stone structure, 160 x 70 feet, and, through the liberality of manufacturers, is already filled with the newest patterns of the leading types of implements and farm machinery.

The Swine Barn is a wooden structure, 30 x 80 feet, with granitoid floor, iron pen partitions, and woven wire fenced yards, and is altogether a model structure for the purpose intended.

The live stock appropriation was used principally for the purchase of beef cattle, horses, hogs and sheep. Only pedigreed animal of the most approved type were purchased, and the animals thus acquired add greatly to our facilities for instruction in Animal Husbandry. A considerable portion of the appropriation to the College and Experiment Station was used for experiments in feeding, in fertilizers, in crops and in the soil survey already referred to.

XV. Medical Department . . . . . \$3,00

This money was spent in the purchase of books for the Medical Library.

XVI. State Military School. .... \$30

This small sum was expended for the purchase of band instruments for the Cadet Band, but was found altogether inadequate to supply the needs.

## NEEDS OF THE UNIVERSITY.

### A. Departments at Columbia.

I. Maintenance . . . . . \$492,000

(Should come from the general revenue fund.)

This is by far the greatest need of the University. The sum which we ask is greater than that which we asked two years ago, for several reasons.

The special appropriations made by the Forty-third General Assembly called for several additions to the teaching force and assistants in the College of Agriculture and Experiment Station, the School of Engineering, and other departments. Owing to the large increase in the number of students in the regular session this year, the Curators have found it necessary to add several additional instructors and assistants in those lines of work that were overcrowded. Then, too, it has been found necessary to raise the salaries of some men in order to retain them here.

The increase in the cost of maintenance is also due in part to an increase in the number of buildings to be cared for, involving greater expense for janitors, heat, power, light, water, etc.; to increase in the cost of labor and materials, the cost of coal alone having increased a considerable sum; and the large increase in the enrollment of students that is assured for the next two years renders it a matter of vital importance that the Board be authorized to maintain the various departments of the University efficiently by meeting emergencies of expense as they arise.

The increase in the cost of maintenance from all these sources is not as great in proportion as has been the increase in the enrollment of students during the biennial period just closed.

### Stable Income for Maintenance.

The method which the State pursues in regard to the University is open to grave objection. At the close of every biennial period the institution is compelled to go into bankruptcy. If it shows a balance in its treasury, that is deducted from its next appropriation; while, if it exceeds its appropriation, it has committed a misdemeanor in law. The University is practically compelled biennially to go into bankruptcy without balance and without credit. While it has some income from fixed endowment, that income does not pay one

fourth of what it costs to keep the institution going. Biennial bankruptcy makes the best administration impossible. The most important thing before the Forty-fourth General Assembly in connection with the University, after providing for its maintenance in this biennial period, is the enactment of such legislation as will give the institution a stable income for its support, leaving it to get its buildings and improvements out of the Collateral Inheritance and other special taxes. Every State University in the northern half of the Mississippi Valley, excepting Missouri, Illinois, Kansas and Iowa, has its maintenance perfectly assured. Iowa has a fixed income for buildings. The Universities of Michigan, Wisconsin, Minnesota, Ohio, Indiana, and Nebraska have their maintenance perfectly assured through the wise legislation enacted by their General Assemblies. Missouri ought to add her University to this class.

**2. Summer Session . . . . . \$20,000**

During the past two summers 800 students and teachers have taken advantage of our summer courses. By far the larger number of them were teachers. All the Academic instruction given at Columbia was of University grade counting toward the degree of Bachelor of Arts or Bachelor of Science in Education. It is fair to estimate that at least 40,000 children in the State have been receiving better instruction for the past two years, owing to the attendance of their teachers upon the summer sessions of the University. To develop this work and to provide sufficient variety of courses to meet the needs of all teachers, an increase in the appropriation is necessary. This will save Missouri teachers the necessity of going to other states for summer work.

**3. Parker Memorial Hospital. Maintenance.....\$12,000**

(Should come from the general revenue fund.)

During the biennial period just passed, the Parker Memorial Hospital has proved to be an indispensable addition to the University. Of the ever increasing enrollment of students there is never a time when all are well. In the Hospital they receive at moderate prices the best medicine and best medical and surgical assistance. The lives of some students are saved every year by this Hospital. Moreover, it is open not only to students but to the sick of all the State. To provide the best nursing, surgical and medicinal assistance, and at the same time to place the advantages of the Hospital within the reach of every student and citizen of the State, is with the limited

number of beds (45) impossible if the Hospital is to be self-supporting. We could make it self-supporting by reducing the quality of service; or if there were one hundred beds and all well filled, we could maintain the present admirable service and pay expenses. In return for the expenditures which have been made for its maintenance, the students in the Medical Department have the advantages of the clinics which the Hospital affords.

**4. Contingent Fund . . . . . \$10,000**

(Should come from the general revenue fund.)

It is impossible for any one to foresee during the session of the Legislature all the needs that may arise in two years in so large a University. We ask, therefore, for a contingent fund which it has been the habit of the Legislature to grant.

**5. Libraries . . . . . \$25,000**

(Including salaries of library staff.)

After the payment of the salaries of the library staff the appropriation made by the Legislature, supplemented by a small income from fees, must be divided, in the judgment of the Board of Curators, among the following departmental libraries: History; History of Education; Theory and Practice of Teaching; School Administration; Political Science; Economics; Educational Psychology; Sociology; Philosophy; Psychology; Elocution; English; German; Romance Languages; Latin; Greek; Archaeology; Zoology; Botany; Chemistry; Geology; Mathematics; Astronomy; Physics; Civil Engineering; Electrical Engineering; Mechanical Engineering; Horticulture; Agronomy; Animal Husbandry; Dairy Husbandry; Veterinary Science; Agricultural Chemistry; Freehand Drawing; Mechanical Drawing; Music; Household Economics. The distribution should not always be equal. Some libraries need more money at some times than others do.

**6. Laboratories . . . . . \$25,000**

We ask this sum for the laboratories of Physics, Chemistry, Zoology, Physiology, Pharmacology, Anatomy; Histology, Bacteriology, Pathology, Internal Medicine, Surgery (including Gynecology and the Eye), Geology, Paleontology, Ethnology, Astronomy, Household Economics, Experimental Psychology, Art and Archaeology, Freehand Drawing, and for the salary of the Mechanician to repair apparatus. It should be remembered that each of the labor-

atories mentioned above includes more than one room. In Chemistry, for instance, there are separate laboratories for each of the following divisions: General Chemistry, Qualitative Analysis, Quantitative Analysis, Organic Chemistry, and Physical Chemistry.

**7. Student Labor . . . . . \$10,000**

We ask this appropriation from the Legislature in order that the University may help students, both men and women, who are striving for an education and have to pay their own expenses. This money will be paid for work done in the offices and mailing room of the University, and on the horticultural grounds, and on the experiment farm.

**8. Fellowships and Scholarships . . . . . \$6,000**

The appropriation of \$4,000, made by the Forty-third General Assembly for maintaining scholarships and fellowships, has proved of immense benefit to the University. The Graduate Department has been materially improved under this stimulus. These scholarships and fellowships are awarded to men and women of ability. The small stipend which each receives enables him to prosecute advanced studies, while at the same time he renders some service to the University in reading exercises, examining laboratory books, dealing out supplies, looking up delinquent undergraduates, etc. These fellowships are maintained in every University of note in this country.

**9. Extension Work . . . . . \$10,000**

Next to maintenance and support, we are most anxious to have an appropriation of \$10,000 to enable us to carry out in larger measure the debt which every State University owes to the people at large. Owing to the lack of funds, the University of Missouri has been unable to do in the past the work which has been so successfully undertaken by other institutions as, for example, by Cornell University. We refer to the University Extension Work in Agriculture, in Education and in Sociology. The function of a University is four-fold: (1) Instruction of students on its campus; (2) Research for the benefit of humanity; (3) Publication and the spreading of the results of research among the people at large who have not the means or the time to attend the University in person; (4) Conservation of learning through Libraries and Museums. We have been endeavoring to carry out the work mentioned under the first two divisions. A beginning has been made in the third division, but owing to lack of funds this most important work has not progressed satis-

factorily. The University is anxious to bring home to the people of the State in a greater degree useful information and the discoveries of its College of Agriculture and Experiment Station. The demand upon the University for Extension Work in Agriculture is enormous: We are powerless to meet this demand. Great as has been the work which the University has done in the past twelve years for public school education in the State, the possibilities which now lie before our Teachers College in this direction are immeasurable, if only it is given sufficient money. The Department of Sociology has made exhaustive investigations into the condition of the jails and alms-houses of the State and into the various methods of charitable and philanthropic work. It is now in a position, if the necessary expense is provided for, to bring to the heart of the people of our commonwealth the results of its labors which cannot fail to prove of immense and lasting value.

**10. Publishing and Advertising . . . . . \$10,000**

A campaign which the University has carried on during the past two years through the newspapers of the State and through its own publications has resulted in bringing the institution to the attention of many persons who had hitherto known nothing of their State University. This work of enlightenment is of mutual benefit to the people of the State and to the University. It is hoped that the Legislature will permit this work which has been started in a creditable manner to go on during this biennial period.

**11. Printing Plant . . . . . \$7,500**

The possession of a printing plant would enable the University to save the State considerable expense in its publications in the future, and would partially provide equipment for the practical training of those students who look forward to the profession of Journalism as their life work.

**12. For Paving, Granitoid and Grading . . . . . \$15,000**

It is hoped that the Legislature will permit this work already begun in improving the condition of the walks and grounds about the University to be continued. There should be a good granitoid walk on all sides of the Campus, as there is now on the east side; and the Board should be authorized also to bear the University's share in the expense of paving streets around the Campus and other University grounds, whenever the citizens owning property on these

streets are ready to do their part. That time is now at hand for some work on the streets, and the Legislature is asked for an appropriation which will enable the Board to begin this work.

13. Light and Heat Station.....\$4

The Power Plant at present is in good shape for the present needs of the University with the exception of the boilers and other equipment which have been in service for more than twelve years. Some of these may have to be replaced during this biennial period and as the failure of any of them would cripple the plant, were we unable to replace them, a sum of four thousand dollars is asked for renewals and equipment for light and heat.

The Board is not ready to ask for a new Power Plant, but it  
not be long before the needs of the University will require a  
plant of larger size to care for the greater University.

## DEPARTMENTS.

### 14. (a) Academic Department.

#### (1) Additional Teachers ..... \$12,000

Additional teachers are imperatively needed in at least a dozen lines of Academic work.

In some subjects it was necessary in the present session to decline to admit students to the courses because of the insufficiency of the teaching corps. There has been an increase in this biennial period of about 40 per cent in the enrollment of students in this Department. Unless the sum asked for for additional teachers is procured, it will be necessary to permit the classes in some subjects to be greatly overcrowded or to limit the enrollment by declining to admit more than a certain number of students.

#### (2) Physical Training, Grounds and Equipment ..... \$10,000

This amount is needed for partial support of the Department, for completion of the equipment for the new gymnasium, and for the grading and laying out of the athletic grounds.

#### (3) Physics Laboratory ..... \$75,000

The work in Physics is done at present in the Engineering building. The rapid growth of the Engineering Department has so increased the demand for floor space that all of the rooms in the Engineering building are now badly needed for work in Engineering. The work in Physics is done in crowded quarters and under great difficulties. The result is that some of the most important work cannot be done at all in the present Physics laboratory. The second year laboratory work is now given in two small basement rooms, poorly lighted, and with no ventilation except that which comes through small windows near the ceiling. Practically no place is available for advanced work, and none of the facilities seen in every good laboratory are available here. This important subject, which concerns nearly every Department of the University, should not be so located that the best results cannot be reached. The need of a separate building for the work in Physics is extremely great.

#### (4) Chemical Laboratory ..... \$75,000

The present chemical laboratory is altogether too small. To indicate the overcrowded condition of this building it may be men-

tioned that there are now 375 students working in the laboratory and there are only places for 296, necessitating two students using one locker. This subject is one that concerns every Department of the University except that of Law. The present laboratory is so over-crowded as to make it uncomfortable for the students, if not really a menace to their health.

### **15. (b) Teachers College.**

**(1) Additional Teachers and Assistants.....\$7,000**

The staff in this Department is now insufficient to meet the growing demands made upon them. Especially the Schools for Observation and Practice, established in order to ensure efficient practical training of teachers by the Teachers College, are in sore need of more assistants, as it is impossible to rely entirely upon the work of practice teachers which must be somewhat irregular and uncertain. In order that the teachers in training may have good models for their future work, a few excellent teachers must be provided for both elementary and high school courses.

**(2) Libraries and Laboratories in Elementary and High Schools .....** \$1,000

In order to carry on practice teaching in high school science a small amount is needed to equip laboratories in Physics and Biology at least, and small libraries must be provided for both Elementary and High Schools.

**(3) Teachers College Building .....** \$50,000

This is the only distinct Department of the University that has no building for its special field of work. At present old and ill adapted buildings are rented for the use of the Schools of Observation and Practice, and a building is imperatively demanded in which professional instruction may be offered to students of the Teachers College and in which the Schools of Observation and Practice may be conducted. This would tend to place the Teachers College on a par with the other Departments of the University.

**16. (c) College of Agriculture and Mechanic Arts, including the Experiment Station.**

(1). Teachers, Assistants, etc.....	\$8,000
(2). Soil Survey .....	15,000
(3). Experiments .....	20,000
(4). Animal Husbandry, including purchase of pure bred stock.....	15,000
(5). Equipment in Entomology, Dairy Husbandry, Animal Husbandry, Horticulture, Botany, Agronomy, Home Economics, and Veter- inary Science .....	16,000
(6). Refrigerating Plant for Dairy .....	3,000
(7.) Agricultural Building and equipment.....	150,000
(8.) Veterinary Laboratory and Hospital and equipment .....	50,000
(9.) Poultry Building and Equipment .....	10,000

The poultry products of Missouri are estimated to be worth \$70,000,000 annually. They exceed in value our annual wheat and oat crop combined, and are worth more than our combined dairy and fruit output; yet, aside from a week's lectures each year on this subject in the University, there is not a single dollar being expended in instruction or research anywhere in Missouri on this important subject.

The building on the campus now used by the College of Agriculture is the oldest owned by the University, was never well adapted to its purpose, is entirely too small, is poorly ventilated, and is not commensurate with the importance of Agriculture in the University. We request that money be appropriated for the erection of a new and suitable building, which may likewise serve as headquarters for the State Board of Agriculture.

In the matter of the Veterinary Laboratory and Hospital, it should be borne in mind that Missouri is perhaps the leading live stock state in the union. Necessarily, therefore, the loss from animal diseases is a heavy tax upon stock men, and any instruction and investigations which will enable them to reduce this loss will add materially to the wealth of the state, and money spent on them will be wisely invested. The Forty-second General Assembly made an appropriation for this purpose, but the money failed to materialize. The Forty-fourth General Assembly is earnestly requested to repeat this appropriation.

**17. (d) Law Department.**

**Law Library and Special Lectures.....\$10,000**

This sum is needed to increase the Law Library so as to make it more useful to the students, to administer it during the two years, and for the payment of special non-resident lecturers.

**18. (e) Medical Department.**

**Improvements in Parker Memorial Hospital and Medical Laboratories .....** \$5,000

The Hospital needs various repairs, painting, and equipment for the diet kitchen, patients' bath room, and nurses' rest room.

Certain improvements in the Medical Laboratories are also urgently needed. An anatomical museum is indispensable, not for exhibition purposes, but for constant use in instruction and research. Some valuable material has already been collected, but an appropriation is necessary to fit up a room and to prepare the specimens for use. No less important is the necessity for providing a suitable place for taking care of the animals used for experimentation and study in the various Medical Laboratories. This is particularly true in Physiology, Pharmacology, Bacteriology, and Pathology. The laboratory work is much hampered by the lack of these facilities. Even with the strictest economy it will be impossible to meet these needs with less than the amount asked.

**19. (f) Engineering Department.**

The sums asked for the Engineering Department are:

- |   |          |
|---|----------|
| (1) Addition to Engineering Laboratory..... | \$25,000 |
| (2) Road Laboratory .....                   | 10,000   |
| (3) Additional Teachers for 16 months.....  | 3,600    |
| (4) Equipment .....                         | 7,500    |

The great need of the Engineering Department is space for the various laboratories, drawing rooms and class rooms. There is a number of rooms in which two classes are compelled to be present at the same time, and in certain courses the classes have to be divided into sections because all of the class can not be accommodated at one time. In the laboratories also there is great need of additional space -<sup>s</sup> at present these are greatly crowded with apparatus. To relieve

this congestion of the Engineering building, it is advisable to remove the Physics Department to a new building at once and in addition to enlarge the present building. The present enrollment of over four hundred students in Engineering taxes the buildings to their utmost capacity, and with the larger enrollment, which we expect in the next few years, the buildings will be inadequate. For the relief of this congestion we recommend that a sum of twenty-five thousand dollars be appropriated for additional buildings for the Department of Engineering and that the money recommended elsewhere for the new Physics Laboratory be appropriated. This latter appropriation will not only aid the department of Physics, but it will give the Engineering Department space which is absolutely needed.

The importance of good roads to the State makes it necessary that the State University establish a Road Department for the better training of our students in Road Engineering. The Board has created a chair of Road Engineering, but it has at present no funds for the salary of such a position. For Instructors in this department and other Engineering Departments needing additional teaching force, the Board asks for an appropriation of thirty-six hundred dollars for a period of sixteen months.

The equipment of a Road Laboratory, in which the materials for Road Building are to be tested, is necessary for proper work of this new department, and for the equipment a sum of ten thousand dollars is asked. Although this is not sufficient for a complete equipment such as is hoped for in time, it will be sufficient for the first machines which we desire to install.

The Engineering Laboratories have been placed on a firm basis by the two preceding legislatures, but there still remains much apparatus with which we should be equipped to bring the Engineering Department up to the standard maintained by the institutions of our neighboring states. The Board asks that a sum of seventy-five hundred dollars be appropriated for the purchase of additional machines. The necessity of this expenditure may be seen when the large enrollment of the Department is considered and when it is remembered that the Missouri students should be brought in contact with the new apparatus which they are to meet in practice after leaving the institution.

20. (g) Missouri State Military School.

(1) Uniforms . . . . .	\$9,000
(2) Band Instruments . . . . .	2,000

The appropriation made by the Forty-third General Assembly for uniforming the Cadets was insufficient, and a levy upon the Cadets was found necessary in order that all might appear for drill in appropriate uniforms. Even if the number of Cadets shows no increase during this biennial period, which is very unlikely, the amount asked for will be barely sufficient to cover the cost of necessary uniforms. Band instruments are also much needed at present.

## 21. Fire Escapes.

By acts of former General Assemblies the University is required to construct a number of fire escapes on various buildings. No fire escapes have yet been constructed in accordance with the provisions of these acts, for the reason that no funds were provided by the Legislature for the purpose. If the law is to be strictly complied with, it will be necessary for the Forty-fourth General Assembly to make an appropriation, which shall be sufficient for the construction of fourteen fire escapes, which will cost, approximately, \$5,000.

### Summary of Needs of Departments at Columbia.

Maintenance . . . . .	\$492,000
Summer Session . . . . .	20,000
Parker Memorial Hospital . . . . .	12,000
Contingent Fund . . . . .	5,000
Libraries . . . . .	20,000
Laboratories . . . . .	20,000
Student Labor . . . . .	10,000
Fellowships and Scholarships . . . . .	6,000
<del>Extension Work</del> . . . . .	10,000
Publishing and Advertising . . . . .	10,000
Printing Plant . . . . .	7,000
Grading, Granitoid and Paving . . . . .	10,000
Light and Heat Station . . . . .	4,000
Academic Department . . . . .	172,000
Teachers College . . . . .	58,000
College of Agriculture and Experiment Station . . . . .	187,000
Law Department . . . . .	10,000
Medical Department . . . . .	5,000
Engineering Department . . . . .	46,100
<del>Missouri State Military School</del> . . . . .	11,000
<i>Cold Storage &amp; Domestics</i> . . . . .	3,000

### B. School of Mines and Metallurgy (at Rolla).

Elsewhere in this volume will be found a report on the School of Mines and Metallurgy at Rolla, and a statement of its needs during the Biennial Period beginning 1 January, 1907.

### Proposed Soldiers' Memorial Building.

It has been proposed that the money now in the Treasury of Missouri, known as the War Fund, be used for the erection of a memorial to Missouri soldiers who fought in the Civil War, and that this memorial shall take the form of a building erected on the campus of the State University, to contain the Library of the State Historical Society of Missouri, the State Museum, and the Library of the University of Missouri.

The State of Missouri contributed nearly one hundred and fifty thousand men to the armies of the Civil War, which was more in proportion to her population than the number of soldiers furnished by any other state in the Union; and it is fitting that the fund which came to the State as a result of that war should be used for the erection of a memorial to the courage and heroic deeds of her soldiers. No more appropriate memorial could be conceived than a structure within whose fireproof walls there may be stored the precious memorials and records "which shall enshrine the lives of the great dead and their brave deeds in the hearts of all future generations." Such a building, containing such precious treasures, should be placed upon the campus of the State University, where its value will affect every section of the State and people in every walk of life, through influence upon the lives of the youth who, in its ever increasing numbers, will attend the University to extend their culture and prepare themselves for the various professions.

This building could also contain the library of the State Historical Society, whose books and pamphlets deal primarily with Missouri History. This valuable library, which already numbers some seventy thousand books and pamphlets, and which adds annually twelve thousand books and pamphlets to its store, is at present housed in Academic Hall of the University, where the risk of fire is probably greater than in any other building on the University Campus. Many valuable manuscripts and rare volumes are now being withheld from the Historical Society because the collections are kept in a building which is not fireproof. Besides, the Secretary of the So-

ciety has hardly dared to make a beginning in collecting historical relics in which this State is so rich; for the lack of room in which to store them and to properly display them.

Furthermore, the State needs a place in which to preserve the diplomas and medals of awards won by Missouri at the Centennial Exposition at Philadelphia, at the Chicago World's Fair, at Omaha, at Buffalo, at Charleston, at Portland and at the Louisiana Purchase Exposition, at all of which the record of the State was superb. She needs a place in which to preserve and display great collections representative of the wealth of the soil, forests, mines, and other resources of Missouri. More important than these, mementos of her distinguished children and a gallery of portraits of those who have worked for the glory and well being of the commonwealth should be preserved in a great State Museum, housed within this Memorial Building.

Finally, this Memorial Building could provide suitable quarters for the University Library and thus supply the greatest need of the University today.

The main portion of this library is now housed in one room on the first floor of Academic Hall, which is adapted neither in size nor in construction to the purpose for which it is used. Besides this a number of other rooms in various buildings on the Campus are used wholly or in part by the library. None of these buildings are fireproof, and thus the most important and expensive piece of educational apparatus about the University is constantly exposed to the danger of loss by fire. When the main building of the University was burned, in 1892, the fire consumed nearly every book at that time in the University Library. Since that date the State has expended about one hundred and fifty thousand dollars in collecting a new library for the University, which now contains about 100,000 books and pamphlets. The best way to provide against such a loss in the future is to erect a satisfactory fireproof building for the University Library. It will be economy of time, space and money, to have the State Historical Society, the State Museum and the University Library all housed in one great fireproof structure on the University Campus, and such a building would unquestionably be a magnificent memorial to Missouri's soldiers.

For similar purposes, Wisconsin, which is poorer by a third than Missouri is and has just about two-thirds the population, spent \$676,000 on a library building which was located on the University Campus. The University of California will spend about \$1,000,000 on its library building. Leland Stanford University was engaged in

erecting a \$600,000 library when this was ruined by the great earthquake. The Memorial Building, which serves as the library building of the Columbia University, New York City, cost \$1,250,000. Yale expended \$400,000 for the construction of her library building; while Princeton spent \$625,000, and the New York University \$1,000,000. Can the great State of Missouri afford to do less than devote the present War Fund to the erection of such a building as has been described above on the Campus of her State University?

**Reports of Other Bodies.**

Immediately following this report will be found a memorial notice, and valuable reports on the University from the Board of Visitors, and the State Board of Agriculture.

Very respectfully yours,

GARDINER LATHROP,

President of the Board of Curators.

1 January, 1907.

## **IN MEMORIAM.**

---

"The Board of Curators of the University of Missouri has heard, with regret, of the death of D. A. McMillan, for over seven years a member of this Board, and bears testimony in this resolution to the purity and gentleness of his life, his uniform courtesy and to his efficient service upon this Board."

---

The above resolution was adopted by the Board of Curators at its meeting, held April 5, 1906.

---

Prof. D. A. McMillan was appointed curator of the University, May 31, 1899. He was reappointed January 19, 1905, for a second term of years. He died March 4, 1906, at his home in Mexico, Missouri.

# **REPORT OF THE BOARD OF VISITORS.**

---

Columbia, Missouri, November 14, 1906.

To His Excellency, Joseph W. Folk, Governor of Missouri:

Sir:—The board of visitors of the State University, appointed by you under the Revised Statutes of Missouri, has examined into the conditions and needs of the University and submits to you its report.

## **General Conditions.**

We found the University in excellent condition. It is in charge of a competent faculty and is well-managed. The enrollment, which is for the present year 2018, the largest in its history, grows each year larger. Should it continue to grow in the next five years as in the past five years, and there is every reason to believe it will so grow, the enrollment will then be over 3,500. Its percentage of growth in the last year was larger than that of any other State University in America except one. It is becoming a really great University, and should, without extravagance, be made the greatest State University in the southwest if not in the union.

## **Permanent Maintenance.**

Its chief material need is provision by constitutional enactment for adequate stable maintenance. Under the present system of appropriation it is impossible to make plans for the University for more than two years. At the end of each biennial period the University is compelled to present itself without balance and without deficit. The state universities of Michigan, Wisconsin, Minnesota, Ohio, Nebraska and Indiana, leading state universities, are given stable income for actual maintenance. Such provision should be made for the Missouri State University, leaving it free to secure new buildings and other improvements from the collateral inheritance tax or other special funds.

The collateral inheritance tax is, of necessity, fluctuating in its character. It is unsafe to depend upon this for the support of the University, for its bread and butter. Such maintenance should come from the general revenue fund and be made perfectly stable.

### Soldiers' Memorial Library Building.

The pressing need at the University is for a fire-proof library building. That there is now in the state treasury \$475,000, paid by the federal government upon a war claim, gives opportunity for the provision of such a building without costing the taxpayers of Missouri a cent. The construction of a library building, in which should be housed the library of the State Historical Society, numbering 70,000 volumes, the library of the State University, numbering 100,000 volumes, a state museum, an agricultural hall and the administration offices of the state board of agriculture, could be constructed with this fund and, as a memorial to Missouri heroes, it could serve no worthier purpose. No building at the University is so badly needed. The present cramped quarters of the libraries, the liability to destruction by fire, as in 1892, and the necessity for provision for their preservation and use demand such structure. When erected it should be worthy the great state of Missouri.

### Department Buildings.

Department buildings of immediate necessity at the University are a physics laboratory, a chemical laboratory, a teachers' college building and a veterinary laboratory. Physics is now housed with engineering in a building that is not large enough for either. Chemistry is over-crowded. The teachers' college is without any building. It should be placed in a structure of its own as law and medicine. Agriculture needs a new building for administrative work, while a veterinary laboratory would permit research in diseases of cattle most important to the welfare of the cattle industry, with present equipment impossible.

There are other important improvements and additions which, in our opinion, are of high value. Additional dormitories for women and for men should be provided. If this cannot be done by private capital under suitable restrictions, then the state should furnish the means. The libraries and laboratories should be well equipped. The Agricultural College and Experiment Station merit special attention. A college of journalism, upon a plane with colleges of law and medicine, ought to be established. To supply these and other vital needs

of the University requires large appropriations. We realize that the State cannot, with its present limited revenue, immediately provide for all. We have specified only the most pressing and these in the order of their importance.

#### **Missouri Military School.**

The Missouri Military School is a department of the University duly constituted by law. We find this Department to be in a better condition than ever before, and we commend highly its management by the commandant of Cadets, Captain Joseph Frazier, of the 14th Infantry, U. S. Army. We recommend that the statutes be so amended as to provide for two instead of one appointment each year by each Senator and Representative and by twenty-four appointment at large by the Governor, so that regimental drill and tactics can be taught. The uniform should include an overcoat for each cadet, and the appropriation should be estimated on a basis of twenty dollars per capita per annum for each possible cadet appointment. We recommend an appropriation of \$2,000 for instruments for a cadet band. This department needs an armory, but, in view of the other pressing demands of the institution, we refrain from recommending an appropriation for this purpose at this time. The present enrollment of cadets is 299.

#### **College of Law.**

We find the Law Department in a prosperous condition, with an attendance which makes it the largest school of the kind west of the Mississippi. We recommend an appropriation of five thousand dollars for additions to the Law Library. This Department is well equipped so far as building accommodations are concerned.

#### **Farmers' School.**

There is in the College of Agriculture at present a regular four years course, for which the matriculant must present the same requirements in preliminary work as for the regular academic courses. There is also a short winter course in agriculture open to the farmers of Missouri without any requirements. We recommend that there be further established in this department a course of instruction to be known as the Intermediate Course in Agriculture. This course should comprise at least one regular school term, and any applicant for entrance therein should be entitled to take this instruction with-

out any examination or preliminary requirements. The course should cover practical farming, horticulture and stock-breeding, and be such that farmer boys could enter it from the country schools.

### School of Mines.

With respect to the School of Mines, we have heretofore made a special report to your Excellency which will speak for itself, and which may be considered as a part of this report. We believe that the School of Mines is well equipped with buildings, but the laboratory equipment seems to be inadequate so far as we could ascertain by our inspection and examination. The subject requiring a specialized and highly technical knowledge, which none of us possess, we do not feel qualified to make specific recommendations, but assume that the particular needs of the institution along this line will be made known by the Curators of the University.

### Examination of Accounts.

So far as the accounts and the book-keeping of the University are concerned, we find that it is impossible for any Board of Visitors, even if qualified for such work, to make a thorough and accurate examination of the books of the University in less than two or three weeks' time. We believe that it would be good policy to enact a law constituting an office to be held by an appointee of the Governor, known as the Examiner of State Institutions, who should be an expert accountant whose duty it would be, like a bank examiner, to go to every institution of the State, at least once a year, and more frequently, if thought necessary, without notice, and examine the books and accounts of the institution and make written reports thereof.

### Conclusion.

We desire to conclude our report with these general remarks, namely: That the unprecedented growth of the University during the past ten years, which in the last year past is the greatest in percentage of any institution of higher education in the United States with but one exception, as before mentioned, and that this increase is such that every building on the main campus of the University is inadequate for present demands and entirely too small for the requirements of the immediate future. This expansion of the University for the past few years, and that indicated for a like ensuing period, is such that the Board of Visitors are of the opinion that all

plans and appropriations for buildings and equipments should have in view accommodations for from two to three times the numbers now in attendance.

Respectfully submitted,  
CHARLES E. YEATER,  
BENTON GABBERT,  
EDWARD T. EVERSOLE,  
A. H. BOLTE,  
W. O. L. JEWETT, Chairman.

**REPORT ADOPTED BY THE STATE BOARD OF AGRICULTURE—DECEMBER, 1906.**

Mr. President:

We, your committee, appointed to examine into the affairs of the College of Agriculture and Experiment Station, have discharged that duty, and beg to submit the following report:

We find the grounds, buildings and livestock well kept and in good condition.

We are pleased to note a number of important improvements in the equipment of the College made during the past year, among which may be mentioned:

The Farm Machinery Laboratory, a substantial stone structure, commodious and apparently well designed for its purpose.

The Hog House, which is now nearing completion, seems to be well adapted to the purposes for which it is designed.

A much needed Plant House for the Department of Botany is now in process of erection.

It is with especial pleasure that we note the improvement in the number of draft horses, and the improvements in the flocks of sheep, on the Farm. This includes additions to the Shorthorn and Hereford breeding herds, to the different breeds of hogs, the additions of a number of draft horses, and the improvements in the flock of sheep. While we are pleased to note these improvements, we strongly urge still larger expenditures along these lines.

The character of the cattle and sheep used for the experimental work now in progress could scarcely be improved upon.

**Soil Survey.**

We especially desire to commend the progress made in the State Soil Survey. We find that the preliminary survey has covered practically the whole of South Missouri, that more than 200 samples of soil have been collected, representing all the principal types in this portion of the State, nearly one-half of which have already been analyzed, including samples from the following counties: Barry, Barton, Bates, Cape Girardeau, Cass, Cedar, Christian, Crawford, Dent, Dunklin, Franklin, Gasconade, Hickory, Jefferson, Johnson, Lawrence, McDonald, Maries, Morgan, Nodaway, Pemiscot, Phelps, Polk, Pulaski, Reynolds, Shannon, Texas, Vernon, Washington, Wright.

We observe, further, that experimental fields for a more extensive study of the crops best adapted to these different soils, their fertilizer requirements and the best crop rotations, have been established as follows: Monroe City, Monroe County; Unionville, Putnam County; Billings, Christian County; Purdy, Barry County—from all of which the College already has two years' results. One year's results have been obtained from experimental fields at Lamar, Barton County; Adrian, Bates County; Cuba, Crawford County; Dixon, Pulaski County; Popular Bluff, Butler County.

It is of interest to note, also, that there have been established special experiments to determine the feasibility and profitableness of the tile drainage for certain areas of the State. Such drainage fields have already been established at Lamar, Barton County, and at Monroe City, Monroe County, and arrangements are practically completed for similar experiments at Poplar Bluff, Butler County; Centralia, Boone County, and at Trenton, Grundy County.

The importance of this work would amply justify the Legislature in supporting it much more liberally than in the past, in order that it may be greatly extended.

#### Recommendations.

It is the opinion of your committee that Missouri's Agricultural College should not be conspicuous at the great international livestock shows by the absence of her students trained in stock and grain judging, nor by the absence of representatives of its herd and flocks fed and prepared by the students. It seems to us that the College can in no other way so effectively impress the high character of its work and the importance of this sort of instruction upon the public as by joining the colleges of neighboring states in the active participation in the great international shows. This is particularly true of such shows as the American Royal Live Stock Shows, held at Kansas City, and the International Live Stock Show, held at Chicago. It is strongly urged that the Board of Curators provide the College with sufficient funds and with all the facilities for entering upon this enterprise in a manner which will reflect creditably upon the Stock Breeders and feeders of the State.

We desire to renew our recommendation of last year in reference to the dairy barn, which, as was then pointed out, is entirely inadequate and unsuited to the purpose. Scarcely any progressive private dairyman in this State has so illly ventilated and poorly arranged a barn for his dairy herd. It is earnestly recommended that the 44th

General Assembly make an appropriation for the erection of a modern dairy barn in lieu of this one.

Among the urgent needs of the College for which the forthcoming Legislature should make provision, are the following:

Additional teachers and assistants.....	\$10, 10
Soil Survey . .....	15, 00
Experiments . .....	25, 00
Animal Husbandry, including purchase of pure bred stock.	15, 00
Equipment of Dairy Husbandry, Botany, Domestic Science, Agronomy, Horticulture, Veterinary Science and Entomology. . .....	16, 00
Refrigerating Plant for Dairy .....	3, 00
Poultry Plant, including equipment and instructors.....	10, 00

Missouri is the leading poultry state in the Union. Our poultry products are worth annually approximately \$70,000,000, exceeding in value our annual wheat and oat crop combined, and yet, aside from a week's lectures on the subject in the University, there is no single dollar being expended in instruction or research in the entire State upon this important subject.

#### Pure Food Law.

A law regulating the sale of feed stuffs for livestock, similar to that now on the statute books for the control of the manufacture and sale of commercial fertilizers, should be enacted. Practically all the states in the Mississippi Valley, except Missouri, have such a law, and the result is that Missouri is being made the dumping ground for all of the adulterated, spurious and worthless foods which have been driven out of our neighboring states by the enforcement of the laws. Our farmers, stockmen and citizens in towns and villages who keep horses and cattle are thus made to suffer the penalty of neglect in this important matter.

It is likewise true that the Missouri market is open for the food and drugs intended for human consumption which are so badly adulterated, misbranded and deleterious to public health as to have been excluded from the markets of our surrounding states. The control of this matter, as well as that of the stock foods, should be placed in the hands of the Experiment Station.

### **Buildings.**

New Agricultural Buildings, \$200,000. The building now used by the College of Agriculture is the oldest owned by the University, was never well adapted to the purposes, is entirely too small, is ill ventilated, and is not commensurate with the importance of Agriculture in the University. We would strongly recommend, therefore, that the sum of \$200,000 be appropriated for the erection of a new and suitable building, which would likewise serve as headquarters for the Board of Agriculture.

Veterinary Laboratory and Hospital, \$50,000. It should be borne in mind that Missouri is one of the leading livestock states in the Union. Necessarily, therefore, the loss from animal diseases is a heavy tax upon the stockman, and any instruction and investigations which will enable him to reduce this loss will add materially to the wealth of the State and be money wisely invested.

The 42nd General Assembly made an appropriation for this purpose, but it was against the Collateral Inheritance Tax, and the money failed to come into the fund. The 44th General Assembly is earnestly requested to repeat this appropriation.

### **The Leading Agricultural College in the World.**

In the heart of the greatest agricultural region in the world, the Mississippi Valley, will grow up in the near future the greatest agricultural college in the world. To it will be attracted students from every civilized country on the globe. It will furnish the citizens of its own state with the best instruction of its kind to be had. Missouri, one of the richest of these states, with a more diversified agriculture than any other, and with the most central location, is peculiarly well suited to build such a college. The cost of an enterprise of this sort will necessarily be great, the time required for its building, long. If Missouri is to have any part in this great progressive movement, and is to have an institution that is even creditable, much less distinguished, she must deal more liberally with it than in the past. Our neighboring states of Iowa, Illinois and Kansas have frequently at a single session of their Legislature appropriated more money to their colleges of agriculture than Missouri has given hers since it was established in 1870.

**Assured Support.**

It will not be sufficient to appropriate large sums of money to the College of Agriculture against a fund like the Collateral Inheritance Tax, which may or may not materialize. The support of the College should be placed against the general revenue fund of the State.

In order that a proper beginning may be made in the improvement of the College of Agriculture, it is earnestly recommended to the Board of Curators and to the 44th General Assembly that the \$94,000 required for betterments, and itemized in this report, be asked for out of the general revenue fund, and that the Veterinary Hospital and Laboratory be placed upon the same fund. The Agricultural Building should be one of the early appropriations to come out of the Collateral Inheritance Tax.

We approve of the suggestion to devote the \$475,000 war fund to the erection, on the University grounds, of a Memorial Building to Missouri's soldiers in the late Civil War, this building to contain great agricultural museum and convention hall for farmers' meetings and to provide the headquarters for the Board of Agriculture until at least a new Agricultural Building shall be completed.

# **REPORT OF THE SECRETARY OF THE BOARD OF CURATORS FOR 1905 AND 1906**

---

Columbia, Missouri, January 1, 1907.

To the Curators of the University of the State of Missouri.

Gentlemen: Complying with the requirement of section 10484 of the Revised Statutes of Missouri, 1899, I have the honor to submit herewith a report for the biennial period beginning January 1, 1905.

This report contains the following:

I. The appropriations made by the Forty-third General Assembly for the departments of the University at Columbia and the receipts for the Biennial Period.

II. Disbursements for 1905 and 1906.

III. Summary of disbursements for 1905 and 1906.

IV. Report of Treasurer of the Board of Curators.

V. Salaries paid teachers and officers.

VI. Students attending the University at Columbia during the biennial period.

VII. Report of the School of Mines and Metallurgy.

Respectfully submitted,

**J. G. Babb,  
Secretary Board of Curators.**

**APPROPRIATIONS MADE BY THE FORTY-THIRD GENERAL ASSEMBLY  
UNIVERSITY AT COLUMBIA.**

<b>From the General Revenue Fund:</b>		
Maintenance . . . . .		\$25
<b>From the Collateral Inheritance Tax Fund:</b>		
Maintenance . . . . .	\$121,000 00	
Summer Schools . . . . .	12,000 00

W. B. Saunders & Co., 1 book for Practice of Medicine	5 00	12,472 06
<b>Laboratories.</b>		
C. M. Watson, show cases.....	\$200 00	
Eimer and Amend, laboratory equipment and supplies	128 50	
Bausch & Lomb Opt. Co., laboratory equipment and supplies .....	94 08	
C. H. Stoelting & Co., laboratory supplies.....	92 52	
Sligo Iron Store Co., supplies for Mechanic Arts.....	72 70	
Narragansett Machine Co., equipment and supplies for Anatomy .....	63 50	
G. E. Stechert, equipment for Geology.....	61 35	
H. H. Bullard, salary for January.....	60 00	
Meyer Brothers Drug Co., supplies for Anatomy .....	47 48	
J. F. Heinrichs, supplies for Anatomy.....	47 48	
German Educational Exhibit, equipment for Physiology .....	39 74	
F. O. Boyd & Co., supplies for Chemistry.....	21 24	
E. E. Brunner, supplies for Anatomy.....	20 00	
Western Electric Co., equipment and supplies for Physics .....	19 62	
Fairbanks, Morse & Co., equipment and supplies for various departments .....	19 18	
M. S. Bowen, labor for Geology.....	19 00	
L. B. Kreutz & H. La Rue, labor for Civil Engineering laboratory .....	18 70	
The S. S. White Dental Mfg. Co., chemical supplies.....	11 51	
Walter McNab Miller, cash expended for Pathology.....	16 45	
Geo. Crow, labor for Anatomy .....	15 50	
Weston Elect. Inst. Co., supplies for Physics.....	11 58	
C. W. Greene, cash advanced for Physiology.....	8 00	
The Taunton Locomotive Mfg. Co., supplies for Mech. Eng. ....	7 20	
Brown & Sharpe Mfg. Co., equipment for Geology .....	5 00	
Geo. Lefevre, cash advanced for zoological supplies..	4 65	
C. V. Stewart, labor for Physics.....	4 10	
Carl Kehr, supplies for Physics.....	3 50	
German Educational Exhibit, refund of transportation and installation charges on exhibit.....	700 00	
The Tandy Lumber Co., lumber for Mech. Arts.....	97 91	
W. B. West & Sons, smithing coal for Mech. Arts...	93 80	
Jas. G. Biddle, equipment for Geology .....	90 00	

## DISBURSEMENTS FOR 1905—Continued.

No. of warrant.	To whom issued.	Amount.	To
591	Ernst Leitz, equipment and supplies for Anatomy and Zoology .....	69 44	
592	H. H. Bullard, salary for February.....	60 00	
593	German Commissioner General, equipment for Anatomy .....	54 50	
594	R. L. Burns, labor and supplies for Botany.....	30 32	
595	Elmer & Amend, equipment and supplies for Physiology and Agronomy .....	28 09	
596	Henry Disston & Sons, supplies for Mech. Arts.....	26 25	
597	E. E. Brunner, 1 subject for Anatomy.....	20 00	
598	Wm. Gaertner & Co., supplies for Physics.....	19 46	
599	The American Tool Works, equipment for Mech. Arts	17 00	
600	Moss Vehicle & Imp. Co., smithing coal for Mech. Arts .....	14 35	
601	Peck Drug Co., supplies for Veterinary.....	14 25	
602	Sligo Iron Store Co., supplies for Mech. Arts.....	13 14	
603	Henry Hell Chemical Co., laboratory supplies.....	10 98	
604	Geo. B. Crow labor for Anatomy .....	10 25	
605	Central Scientific Co., supplies for Physics.....	10 04	
606	Paul Hayhurst, labor for Botany .....	9 75	
607	Bausch & Lomb Opt. Co., laboratory supplies.....	7 42	
608	H. J. & C. E. Gribble, equipment, etc. for Pathology .....	6 50	
609	J. W. Scribner & Company, equipment and supplies for Astronomy .....	5 17	
610	John C. Fisher, equipment for Pathology.....	5 00	
611	Clinkscale Spoke & Handle Co., supplies for Mech. Arts .....	4 99	
902	Ernst Leitz, equipment and supplies for Internal Medicine .....	132 35	
903	Martin Schilling, mathematical models.....	84 00	
904	A. H. Glass Painting Co., painting and varnishing.....	76 70	
905	August Gerber busts and figures for Archaeology.....	75 00	
906	G. E. Stechert & Co., laboratory equipment.....	66 96	
907	H. H. Bullard, salary fo March.....	60 00	
908	Sligo Iron Store Co., supplies for Mech. Arts.....	43 13	
909	Elmer & Amend, laboratory equipment and supplies .....	34 45	
910	Jacoby Foundry & Mach. Co., castings for Physiology .....	26 94	
911	F. O. Boyd & Co., 1 barrel alcohol for Pathology.....	21 82	
912	Riehle Bros. Testing Mach. Co., supplies for Civil Engineering .....	14 25	
913	Geo. Crow, labor for Anatomy .....	11 50	
914	Geo. Lefevre, supplies for Zoology .....	10 05	
915	Walter McNab Miller, cash advanced for Pathology .....	9 15	
916	C. H. Stoelting & Co., supplies for Physics .....	8 58	
917	D. Blakeley Hoar, Treasurer supplies for Zoology .....	8 00	
918	L. E. Knott, Apparatus Co., equipment for Physics .....	7 20	
919	Harwood University, astronomica telegrams .....	6 40	
920	A. A. Sphung, supplies for Physiology .....	5 00	
921	Henry J. Green, supplies for Mech. Eng.....	4 05	
922	A. H. Shepard, supplies for Physiology .....	4 04	
923	Century Electric Co., equipment for Astronomy .....	3 96	
924	Western Electric Co., supplies for Zoology .....	3 76	
925	R. F. Rogers, supplies for Mech. Arts .....	3 75	
926	G. A. Gray Co., supplies for Mech. Arts .....	3 75	
927	W. B. West & Son, equipment for Geology .....	3 50	
928	J. E. Miller, labor for Classical Archaeology .....	3 50	
929	B. F. McCurdy, supplies for Physiology .....	3 00	

## DISBURSEMENTS FOR 1905—Continued.

No. of warrant.	To whom issued.	Amount.	Total.
1254	H. H. Bullard, salary for April.....	60 00	
1255	Elmer & Amend, equipment and supplies.....	52 87	
1256	J. Tackagi, labor for Botany.....	18 90	
1257	Western Elect. Co., Electrical Eng. supplies.....	12 90	
1258	Walter McNab Miller, supplies for Pathology.....	12 40	
1259	Bausch & Lomb Opt. Co., laboratory supplies.....	11 79	
1260	Geo. B. Crow, labor for Anatomy.....	10 00

3630	B. F. McCurdy, live frogs for Physiology .....	15 00	
3631	Ward Leonard Elec. Co., apparatus for Elec Eng.....	14 54	
3632	Walter McN Miller, cash advanced for Pathology.....	14 40	
3633	Slatington Bangor Slate Syn., equipment for Zoology .....	13 03	
3634	Peck Drug Co., drugs, etc.....	12 65	
3635	The Chas. A. Strelinger Co., laboratory supplies.....	12 02	

## DISBURSEMENTS FOR 1906—Continued.

	To whom issued.	Amount.	Total.
16	D. Blakely Hoar, supplies for Zoology.....	10 50	
17	Simplex Net Co., supplies for Zoology.....	10 10	
38	Mrs. John S. Williams, 62 tool cases for Mech. Arts.....	10 00	
39	A. A. Sphung, frogs and turtles for laboratories.....	9 00	
40	Mullett Bros., equipment for Zoology .....	7 00	
41	Eugene Deltzgen Co., supplies for Anatomy.....	6 90	
42	Henry J. Green, thermometers for Mech Arts .....	6 30	
43	Wm. Gaertner & Co., supplies for Physics .....	6 20	
44	Crosby Steam Gage & Valve Co., supplies for Mech. Eng .....	6 00	
45	W. L. Lanham, collecting and preparing material for Botany .....	5 50	
46	Eberbach & Son, supplies for Physics.....	5 45	
47	Henry Heil Chemical Co., supplies for Mech. Eng.....	4 85	
48	J. D. Fay, fire clay for Mech. Arts.....	4 50	
49	The L. S. Starrett Co., supplies for Mech. Eng.....	2 39	
50	E. H. Sargent & Co. laboratory supplies.....	464 61	
51	Bausch & Lomb Opt. Co. laboratory supplies.....	372 03	
52	Hammacher, Schlemmer & Co., 15 doz. Yale locks, and blanks .....	185 59	
53	Schroeter Bros. Hardware Co. laboratory supplies.....	86 84	
54	W. H. Pike, salary for November .....	80 00	
55	Chas H. Ward, equipment for Anatomy.....	60 00	
56	Albert P. Weiss, lantern slides.....	55 00	
57	Machado & Roller, apparatus for Elect. Eng.....	49 74	
58	Central Scientific Co., supplies for Physics.....	42 91	
59	C. H. Stoelting Co., supplies, etc., for Exp. Psych.....	41 08	
60	Eimer & Amend, laboratory supplies.....	31 52	
61	The Emerson Electric Mfg. Co., equipment for Physics	31 50	
62	Mobery Fdy. & Mch. Co., supplies for Mech. Arts.....	25 12	
63	Colburn, Birks & Co., 1 bbl. scientific alcohol.....	21 75	
64	John F. Heinrichs, 1 cadaver for Pathology.....	20 00	
65	Western Electric Co., laboratory supplies.....	18 41	
66	Geo. A. Rubelmann Hdw. Co., equipment for Exp. Psych .....	17 60	
67	Herman Kohlbusch, Sr., supplies for Chemistry.....	13 59	
68	The Chas. A. Strelinger Co., laboratory supplies.....	11 90	
69	Henry Heil Chemical Co., supplies for Mech. Eng.....	11 00	
70	Geo. Lefevre, 35 doz. eggs for Zoology.....	8 75	
71	Butterfield & Co., tools, etc., for Mechanician.....	8 60	
72	L. N. Cathey & Son, hauling 29.6 tons coal for Mech. Arts .....	8 28	
73	Struthers Wells Co., repairing igniting plug.....	7 80	
74	Strawn Holland Dry Goods Co., supplies for Mech. Arts	7 70	
75	B. F. McCurdy, 15 doz. frogs for Physiology.....	7 50	
76	Sharp & Smith, supplies for Vet. Science.....	6 79	
77	W. E. Price, printing stadia boards.....	6 20	
78	Pratt & Whitney Co., apparatus for Mechanician.....	6 00	
79	Crane Company, supplies for Mech. Eng.....	5 95	
80	Edison Decorative & Min. Lamp Dep't., 1 box incandes- cent lamps.....	5 52	
81	Spencer Lens Co., laboratory supplies.....	4 68	
82	F. P. Johnson, drawings for Anatomy.....	4 25	
83	Max Wocher & Son, supplies for Vet. Science.....	3 94	
84	Schaeffer & Budenberg Mfg. Co., repairing coal calorif- meter .....	3 75	
85	Hermann Boker & Co., supplies for Mech. Arts.....	3 42	

## DISBURSEMENTS FOR 1906—Continued.

**SCHOOL OF MINES AND  
METALLURGY.**

**SUMMARY OF NEEDS OF MISSOURI SCHOOL OF MINES  
AND METALLURGY FOR BIENNIAL PERIOD  
ENDING DECEMBER 31, 1908.**

1. Maintenance . . . . .	\$70,000 00
2. Metallurgical and Concentrating wings of ore dressing building . . .	25,000 00
3. Power, Heating and Lighting equipment of ore dressing and metallurgical building . . . . .	12,000 00
4. Extending water works and high pressure pump . . . . .	2,000 00
5. Enlarging mining building and installing steam engine, hydraulic and dynamo laboratories . . . . .	10,000 00
6. General repairs . . . . .	10,000 00
7. Fire insurance . . . . .	1,200 00
8. Laboratory equipment and machinery for metallurgical, assaying, ore dressing, electro-metallurgical, chemical, physical geological, mineralogical and surveying laboratories, and wood and iron shops . . . . .	55,000 00
9. Library, assembly room and gymnasium building . . . . .	75,000 00
10. Grading, Sidewalks and Campus Improvements . . . . .	4,000 00
Total . . . . .	\$264,200 00

**BIENNIAL REPORT OF THE SECRETARY OF THE EXECUTIVE COMMITTEE OF THE SCHOOL OF MINES AND METALLURGY FOR THE YEARS 1905 AND 1906.**

**Rolla, Missouri, December 31, 1906.**

*To the Executive Committee of the School of Mines and Metallurgy:*

Gentlemen—Under the statutes in such cases made and provided, I herewith submit my report, covering the biennial period from January 1, 1905, to December 31, 1906. It will show first the total amount of money received by the School of Mines and Metallurgy during that period, as well as the source from whence it came. The expenditures of same is shown in detail by number of warrants, to whom issued, for what purpose and the amount.

The report will be divided in two parts, the first covering the receipts and expenditures under what is known as the general or maintenance fund; the second part showing the amounts appropriated by the Legislature from the collateral inheritance tax fund, and under each separate heading showing, by number of warrant, the amount that has been spent and charged against said appropriations up to date.

The report will also show some payments that were made on balances due from the former biennial period.

The report is arranged under headings.

I trust that my efforts will meet all necessary requirements, as well as your approval. Respectfully submitted,

CHARLES L. WOODS,  
Secretary.

## I.

**Estimated Value of Property.**

<b>Grounds and Campus .....</b>	<b>\$30,000 00</b>
<b>Engineering Building .....</b>	<b>87,000 00</b>
Equipment of same:	
Administrative Offices .....	1,500 00
Physical Department .....	7,500 00
Mineralogical Department .....	5,000 00
Library, books and equipment .....	12,000 00
Engineering Department .....	7,000 00
<b>Rolla Building:</b>	
(Above was old Main Building, one-half of which is now occupied as headquarters of the Geological Survey. The other half is occupied by the School of Mines. It was built at a cost of \$30,000.00 in 1871)	20,000 00
Equipment of same:	
Mathematical Department .....	100 00
Academic Department .....	100 00
Other equipment .....	200 00
<b>Chemical Laboratory .....</b>	<b>27,000 00</b>
Equipment of same .....	12,500 00
<b>Mechanical Hall .....</b>	<b>12,000 00</b>
Equipment of same .....	7,500 00
<b>Mining and Metallurgical Building (building in dangerous condition) .....</b>	<b>2,000 00</b>
Equipment of same .....	10,000 00
<b>Director's Residence .....</b>	<b>7,500 00</b>
<b>Two Wooden Buildings—Storage Buildings.....</b>	<b>2,000 00</b>
<b>Heating Plant and Boilers .....</b>	<b>17,000 00</b>
	<b>\$267,900</b>

**INCOME FOR SUPPORT OF SCHOOL OF MINES AND METALLURGY FOR BIENNIAL PERIOD 1905-1906.**

To Balance on hand January 1, 1905.....	\$40,000 00	
To Appropriation by Legislature.....	8,747 00	
To Agricultural and Mechanical Fund.....	12,999 16	
To Interest on State Endowment.....	150 00

### ORE DRESSING BUILDING.

The Legislature appropriated \$20,000.00 (\$10,000 from the General fund and \$10,000 from the Collateral Inheritance Tax fund) for the purpose of erecting an ore dressing building. In accordance with this appropriation the executive committee had plans prepared, and advertised for bids, and Lonsdale Brothers of Kansas City being the lowest bidders, the contract was awarded them. The building is now in course of construction, and will be completed before the time limit of the appropriation expires. Warrants have been issued and charged against said appropriation to date as follows:

No. of Warr.	To Whom Issued.	Purpose.	Amount.
23	Globe-Democrat . . . . .	Advertisement for bids.....	\$54 45
02	St. Louis Republic . . . . .	Advertisement for bids.....	55 30
26	Howe, Holt & Cutler. . . . .	Architects . . . . .	450 36
96	Lonsdale Brothers . . . . .	Contract . . . . .	8,020 60
50	Howe, Holt & Cutler . . . . .	Architects . . . . .	475 14
51	Lonsdale Brothers . . . . .	Contractors . . . . .	2,567 00
		Total expended . . . . .	\$11,623 35

### BOILERS AND STACK.

The Legislature appropriated \$3,000.00 out of the Collateral Inheritance Tax fund for new boilers and stack. Warrants have been issued and charged against said appropriation as follows:

No. of Warr.	To Whom Issued.	Purpose.	Amount.
925	Chas. Stuart . . . . .	6 days labor . . . . .	\$9 00
926	Herman Schmidt . . . . .	8 days labor . . . . .	12 00
927	Tom Cox . . . . .	4½ days labor . . . . .	6 75
928	G. E. Mitchell . . . . .	15 days, 9 hours brick work.	95 40

## **BIENNIAL REPORT.**

---

January 1, 1909.

the Forty-fifth General Assembly of Missouri:

Gentlemen: In behalf of the Board of Curators of the University of Missouri, I hereby submit (as required by law) our biennial report, setting forth the conditions and needs of the University in detail. Reports from the following officers are included:

**Mr. J. G. Babb,**

The Secretary of the Board of Curators (at Columbia);

**Mr. J. A. De La Vergne, Jr.,**

The Secretary of the Executive Committee (at Rolla);

**Honorable R. B. Price,**

The Treasurer of the University.

These reports show clearly the amount of money appropriated for the use of the University by the Forty-fourth General Assembly, the amounts received from the National Treasury from what is known as the Morrill Fund, and the collections from fees, laboratory deposits, sub-house rents, and so on; and they show also how these moneys have been spent.

### **DEPARTMENTS OF THE UNIVERSITY.**

The University of Missouri, in the course of its development, has and itself called upon to organize several departments of instruction and administration in response to the needs of the several kinds of vocations followed by the citizens of the State, and the Legislature has recognized them by appropriations for their support and other legislative enactments. At present, the institution is divided into the following Departments, all of which, except the School of Mines and Metallurgy, are at Columbia:

- I. College of Arts and Science (1839).
- II. Teachers College (1867).

- III. College of Agriculture and Mechanic Arts (1870).
- IV. School of Mines and Metallurgy, at Rolla (1870).
- V. Law Department (1872).
- VI. Medical Department (1873).
- VII. Engineering Department (1877).
- VIII. Graduate Department (1896).
- IX. Department of Journalism (1906).

### **APPROPRIATIONS BY FORMER GENERAL ASSEMBLIES.**

In 1867 the State gave aid for the first time to the University—a sum of \$10,000. On January 9, 1892, the main building of the University at Columbia was destroyed by fire. In the following March, the Legislature gave for buildings and equipment, \$236,577. In March, 1893, this fund was increased by a second appropriation of \$264,000, and by \$25,000 additional for a new building at Rolla. The Thirty-ninth General Assembly appropriated \$33,000 to build an additional Club House at Columbia, and the Fortieth erected the Hospital. The Forty-first General Assembly gave for buildings at Columbia, \$192,000, and for the same purpose at Rolla, \$87,000. The Forty-second General Assembly, in addition to appropriations for maintenance, appropriated \$184,200 for buildings, and \$152,000 for equipment and improvements at Columbia, and for equipment and improvements at Rolla, \$108,000; but on account of the failure of the collateral inheritance tax only \$199,898.99 of the amount appropriated for buildings, equipment and improvements at Columbia, were paid, and of the amount appropriated for equipment and improvements at Rolla, \$50,788.14 were paid. The Forty-third General Assembly, in addition to appropriations for maintenance, appropriated for buildings at Columbia, \$70,000, and for equipment and other special purposes, \$159,000. For a building at Rolla, \$20,000 were appropriated, and for equipment and other purposes \$63,000. The Forty-fourth General Assembly, in addition to the sum necessary for maintenance appropriated for an Agricultural Building at Columbia, \$100,000, and for equipment and other special purposes, \$208,000; and for the School of Mines at Rolla, \$10,000 for the Ore Dressing Building, and for other special purposes, in addition to maintenance, \$60,000. The money for the Agricultural Building, which was appropriated from the general revenue, has not yet been paid in to the Treasurer of the University.

## **RESIGNATION OF PRESIDENT JESSE AND APPOINTMENT OF PRESIDENT HILL.**

After seventeen years of devoted service as President of this University, Dr. R. H. Jesse was led, on account of failing health, to tender his resignation in the course of last session, and the same was accepted with great regret by the Board of Curators, to take effect on July 1, 1908. The period of his administration has seen the greatest expansion of the University's activities and the greatest growth in student enrollment, in response to the increased support which has been given the institution by the State. The high standing which this University now has, not only within the State, but in the estimation of educators in all parts of the country, is due in large measure to the ideals, persistent efforts, and wise leadership of President Jesse. The following resolution was adopted by our Board on December 27, 1907, and expresses the sincere convictions of its members:

"The Board of Curators of the University of Missouri does hereby accept with reluctance the resignation of Dr. R. H. Jesse from the presidency, which position he has filled with distinguished ability and success, and in so doing places upon record thus formally, cordial appreciation of Dr. Jesse's services to this University and the State. His presidency has been marked by unselfish devotion to duty and unwavering adherence to high ideals, by qualities of leadership that have brought the University to its present high position. His retirement, due to ill-health occasioned by zealous labors for the institution of which he has been now for nearly seventeen years the honored head, is a source of keen regret to all who know Dr. Jesse's personal worth and work."

On January 6, 1908, the Board of Curators secured the acceptance of the presidency by Dr. Albert Ross Hill, who had been, from 1903 till 1907, Dean of the Teachers College of this University, and during the session of 1907-1908 was Dean of the College of Arts and Science, and Director of the School of Education at Cornell University. Dr. Hill assumed the duties of his office on July 1, 1908, and on December 10 and 11, 1908, was formally inaugurated as President of the University of Missouri. He is already well acquainted with the resources and the people of Missouri, as well as with their educational problems, and he has the confidence of the faculty of the University and of educators throughout the State. The Board of Curators, having confidence also in his character and ability to fill this important position, would bespeak for the University, under his administration, such sympathy and support as will enable him, with the co-operation of Curators, Faculty and citizens of the State, to make the University of Missouri the pride of the commonwealth, and second to no university in America.

## CHANGES IN THE FACULTY.

In an institution as large as the University of Missouri, it is natural to expect some resignations from and additions to the faculty each year. Often men in subordinate positions get opportunities to become leaders of their departments in smaller institutions, and their places here can be filled by younger men, who wish to teach a few years under the leadership of more mature instructors. But the University that is to become great and thoroughly efficient, must be prepared to hold the most brilliant of these younger instructors by promoting them in rank and salary, and providing them with facilities to realize their professional ambitions without going to other States. But especially the men who have already attained to leadership in university instruction, must be retained if the students of Missouri are to be afforded as good opportunities for education as the youth of neighboring States. Universities of these States are, in several cases, now able to offer our most experienced professors much better salaries and better facilities for work than they have here, and we are in constant danger of losing valuable members of our staff.

We regret to have to call your attention to the fact that since our last biennial report, our distinguished Professor of Botany, Dr. B. M. Duggar, has been taken to Cornell University, after making for himself a national reputation as instructor and investigator in this University; that Professor A. M. Greene, Jr., one of our most efficient professors of Engineering, accepted an appointment in Rensselaer Polytechnic Institute at Troy, New York; that Dr. Raymond Weeks, our well-known and scholarly Professor of Romance Languages, has been induced to leave Missouri, his native State for the sake of larger salary and better library facilities in the University of Illinois; and that several other men of great value to the University have been lost to other institutions. It is at the same time a pleasure to report that about a dozen of the most efficient men on the staff have seen fit to decline offers of larger salary and better material conditions for work in other universities because of their loyalty to the University of Missouri and their faith in the people of this State to maintain an institution worthy of the commonwealth and the equal of any university in the country. It rests with the Legislature to determine whether such men will remain much longer with us or accept better opportunities in other States.

In securing new men for the faculty, we have been extremely

tunate during the past year in the quality and standing of the appointees. Men who have already made good reputations in Washington University of St. Louis, the University of Chicago, Cornell University, and elsewhere, have accepted professorships with us and entered upon their duties here with enthusiasm. It is hoped that they will fully measure up to the standard set by their predecessors and that we shall be able to furnish them with such conditions for work that they will feel no disappointment in acceptance of our call, will identify themselves thoroughly with the life of this University, and make instruction of our students their life work. But the Board of Curators would respectfully call the attention of the General Assembly to the fact that great risk is always involved in the selection of new teachers, and that it is much wiser to retain those who have proved themselves in the service of this State University, than to permit changes to occur that force upon us the necessity of seeking satisfactory teachers from other institutions.

### THE STUDENTS.

The spirit among the students of the University and their general behavior and attention to study, have never been better than at present. Our students come from practically all sections of the State, and a few come from other states. As a rule, they are mature enough to appreciate their responsibilities, and are prepared to take advantage of the opportunities furnished by the State for their education. They maintain, largely on their own initiative, a number of organizations that tend to foster unselfish interest in the University and in the State, intellectual and social improvement, and the development of physical vigor and of high character. Among these may be mentioned the Young Men's Christian Association, the Young Women's Christian Association, several Debating Clubs; Glee Clubs for Men and Women, the German Club, the Dramatic Club, the Cadet Band, several literary and scientific societies, student publications, and athletic teams.

In the matter of enrollment, the last biennial period has witnessed a great increase in the Departments at Columbia, and substantial gain in the School of Mines at Rolla. The total enrollment for this year in Columbia will be in the neighborhood of 2,600, or over 500 more than two years ago. This represents an increase of over 25 per cent. of the enrollment during the session of 1906-1907, and is more than the entire enrollment of many a famous college. While such growth is gratifying to those in charge of the adminis-

tration of the University, it creates a serious problem because of the meagreness of the equipment, the shortage of class room space, and the inability of the Board, with the funds at their disposal, to provide instructors in proportion to the increase in number of students.

Of this increase it should be noted that many are young women, for whom adequate provision cannot at present be made in the women's gymnasium, or the bath rooms connected therewith, and it is especially important that the young women of the State who attend the University, should be able to find comfortable and hygienic living accommodations. This cannot always be guaranteed, so long as we depend entirely upon the town for them, and it will doubtless be found necessary, at an early date, to appeal to the Legislature for the building of dormitories for women.

#### **TUITION FEES FOR NON-RESIDENTS.**

The Legislature has determined that instruction at the State University shall be offered free of charge to the youth of the State of both sexes. But no legislative enactment prevents the Board of Curators from charging tuition fees for those who come from other States. Now, there are many advantages to the State in treating all students alike, regardless of the residence of their parents, for those who attend the State University of Missouri tend to become as thoroughly imbued with the spirit of the State and as devoted to its interests as those who were born here. Constant association with Missouri young men and women leads to the adoption of this State as their own. But on the whole, it seems only fair and less liable to misunderstanding, if the youth of Missouri are given a preference at their own University, and accordingly the Board has decided to charge a tuition fee, at the outset of \$20 a year, from all students from outside the State, who enroll in the State University after September 1, 1909.

#### **THE COLLEGE OF AGRICULTURE AND EXPERIMENT STATION.**

**The Prevention of Hog Cholera.**—Elaborate tests have been made of the method of immunization against hog cholera, developed by the United States Department of Agriculture, and the practical application of this method very much improved. Already more than 2,000 hogs have been inoculated, representing several herds. In nearly all cases cholera had already broken out in these herds, and a number

animals had died. In a majority of instances no further deaths occurred, and in all cases the spread of the disease almost immediately ceased. The loss from this disease alone to the Missouri farmer easily falls below a million dollars a year, and sometimes mounts high as five million. If the Veterinary Department of the College provided with facilities and funds for the manufacture of this serum, is confidently believed that the loss from this disease may be so reduced as to be of no economic importance.

It will be recalled that it was through the efforts of the Veterinary Department of the Missouri College that immunization against mias Fever was made successful, and the way to the final and complete eradication of this infection, which covers more than half of the United States, was first clearly pointed out.

**Tests of Soils and Crops in Different Counties of the State.**—The Department of Agronomy has, during the past two years, inaugurated a system of experiments on all of the principal soil types of the State. These embrace tests of the efficiency of different legume and green manure crops for renovating soils, the efficiency of different systems of crop rotation, the value of different fertilizers, comparisons of improved varieties of corn, wheat and oats, with the best local seed, effect of tile drainage on the flat prairie soils and lowlands, the successful introduction of alfalfa are already in progress in 92 of the 114 counties, and it is planned, if proper support for the next two years is given to this work, to locate experiments in each county in the State, and to enlarge the present scope of the work in many cases.

This phase of the College work has been highly appreciated. The people realize that it is giving to each locality exact and definite information of a character that will be of great practical value; besides, these experiments serve a valuable purpose as an ocular demonstration of the importance of improved methods of farming. In the matter of improved varieties of corn alone, it has been shown, as the average of tests made in 80 counties of the State last year, that improved seed, when compared with the best selected local seed, increased the yield slightly over ten bushels per acre. This means that if the 7,000,000 acres normally grown in corn in Missouri had been planted with improved seed instead of even the best local seed, there would have been an increase in the yield of 70,000,000 bushels, worth, at 40 cents per bushel, \$28,000,000.

**A World's Record Dairy Herd.**—The dairy herd belonging to the College, has recently come into much prominence in all parts of the world on account of the large yields of milk and butter produced by a number of its representatives. The world's butter record for a three-

year-old Jersey, is held by a Missouri Agricultural College cow. The second highest world's butter record for a Jersey of any age, was likewise made by one of our cows this year. In milk production, the second highest world's record for the breed is held by a University of Missouri Jersey cow. Another cow from this same herd made this year the third highest world's record, another the fourth, and another the fifth. More cows from this herd have been put into the Registry of Merit of the American Jersey Cattle Club this year than from any other herd in America. The highest milk record of any Holstein cow in the State was made this year by Missouri Josephine, one of the College herd. More cows were put into the advanced registry of the American Holstein-Friesian Association from the College herd this year than from the herds of all the other Holstein breeders of Missouri combined.

**College Fat Stock Win Many Prizes.**—During the past two years the College has exhibited fat stock, fed mainly by students, at all of the leading State, National and International stock shows, and has won in these two seasons 225 prizes, including a number of championships and herd prizes. Students representing the College of Agriculture won three Armour Scholarships at the International Live Stock Exposition, Chicago, and a representative of the College team made the highest average score in judging all classes of live stock ever made by the representative of any agricultural college at any exposition.

#### REPORT ON SPECIAL APPROPRIATIONS MADE BY THE FORTY-FOURTH GENERAL ASSEMBLY.

i. **Summer Session .....** \$15,000

The entire appropriation has been expended in the maintenance of the Summer Sessions of 1907 and 1908. A much larger number of teachers took advantage of the courses offered than in former years, partly due to the fact that it was possible to provide a greater range of studies and more advanced work than in former years. Missouri teachers were thus led to spend their time and money within the State instead of going to Chicago and the universities of the East for summer instruction.

ii. **Libraries .....** \$18,000

As this amount was smaller than that appropriated two years earlier, it was necessary to spend the greater part of it in payment of

laries of the library staff, cataloguers, night librarian, and others employed for special work. But about 5,000 volumes were purchased and catalogued.

**Laboratories . . . . . \$20,000**

This amount has been spent to good advantage in the purchase supplies and apparatus, and in the administration of the large number of laboratories in the several scientific departments.

**Parker Memorial Hospital . . . . . \$12,000**

The total amount of this appropriation has been expended, together with the ordinary income from patients, for the maintenance and improvement of the Hospital. If there were one hundred beds, and all filled, the Hospital could be made practically self-sustaining, but this is impossible under present conditions. The enormous value of the Hospital to sick students makes it a matter of great importance to the State that it be maintained at a high standard of efficiency.

**Sudent Labor . . . . . \$7,000**

Labor on the Horticultural Grounds and State Farm, clerical work in the offices of administration and in the publisher's office, and sundry other items of work in the buildings and on the grounds of the University, have been given to students, both men and women, by means of this fund. The amount has been expended in ways that have been helpful to self-supporting students.

**Contingent Fund . . . . . \$3,000**

This amount has been expended and a much larger amount was needed to meet emergencies that could not have been foreseen.

**Fellowships and Scholarships . . . . . \$4,000**

Graduate students from this and other universities and colleges have been appointed to fellowships and scholarships at \$250 and \$150, respectively, and these persons have in return rendered services to the University in ways determined by the respective departments. The whole amount has been expended.

**Publishing and Advertising . . . . . \$8,000**

The amount has been expended in sending out University bulletins and in efforts to give the public correct information concerning the work of the University and its advantages to students seeking a higher education.

9. Light and Heat Station..... \$4,000  
This amount has been expended in an effort to keep the power plant in as good repair as possible pending a renewal of its boilers and other needed improvements.
10. Cold Storage and Improvement of Dormitories..... \$3,000  
The expenditure of this sum at Lathrop Hall has improved the facilities for the men's dining club and made it more efficient.
11. Grading, Paving, Fences and Walks..... \$5,000  
This sum has been spent and a much larger amount was needed for the improvement of walks about the campus and for street paving.
12. Engineering Department ..... \$10,000  
This amount proved altogether inadequate to provide the necessary equipment for instruction in Engineering which requires expensive apparatus. The whole amount has been spent.
13. Medical Department. .... \$3,000  
This amount was spent in enlarging the facilities for instruction in the laboratories of Anatomy, Physiology and Surgery. It will greatly improve the work in those lines.
14. Law Department. .... \$5,000  
This sum has been spent on the purchase of law books and the administration of the law library.
15. Teachers College. .... \$6,000  
This amount has been expended in furnishing equipment for the schools of observation and practice and in the payment of teachers in these schools.
16. College of Arts and Science..... \$10,000  
Owing to the increased enrollment several additional instructors had to be added in the course of the biennial period, and this amount has been spent for that purpose.
17. College of Agriculture and Experiment Station..... \$75,000  
This amount has been expended in continuing the soil survey of the State that was begun in the preceding biennial period, in testing the soils and crops of different counties of the State, in experi-

ents on the prevention of hog cholera, in the maintenance of animal husbandry, and in general in the promotion of research work and construction in the various phases of agriculture. Some of the most valuable work ever done by the College of Agriculture has been carried on during the biennial period just closed, and investigations have been undertaken which, when completed, promise enormous returns to the farmers of the State. Elsewhere will be found a statement of our plans for the development of this work in the biennium in which we are now entering.

The contract for the new Agricultural Building, for which the last General Assembly appropriated \$100,000, has been let and work on its construction is progressing favorably.

## NEEDS OF THE UNIVERSITY.

### A. Departments at Columbia.

1. Maintenance ..... \$615,000

(Should come from the general revenue fund.)

This is the most important item for the support of the University. It provides for instruction, administration, heating and lighting of buildings, etc., and must be increased with the growth of the institution if the standard of efficiency is not to be lowered. The increase in the number of students calls for a similar increase in the number of instructors, and occasionally salaries of professors already on the staff must be increased to prevent their leaving Missouri for other states, whose universities are better supported. It has not always been possible for us to retain our best men when higher salaries have been offered them elsewhere, but we have found that men of the best ability are always willing to remain in Missouri on terms equal to those which other institutions can guarantee. During the biennial period just closed, the enrollment in all Departments at Columbia for the regular session has increased twenty-five per cent., and the amount mentioned above represents an advance of twenty-five per cent. on the appropriation for maintenance made by the Forty-fourth General Assembly.

2. Summer Session ..... \$20,000

No expenditure made for the University brings proportionately greater returns to the State than that which provides for the maintenance of the Summer Session, conducted primarily for teachers. It enables the State to make use of the buildings and equipment of the University during every month of the year, and a small fund provides instruction for a relatively large number of teachers. The number taking advantage of summer courses during the last biennial period has increased from 403 to 508, or a gain of twenty-six per cent. The amount asked for would enable us to offer a reasonable variety of courses to meet the needs of teachers who are sure to attend, and to provide additional courses especially adapted to rural teachers and county commissioners and superintendents of schools.

**Parker Memorial Hospital ..... \$12,000**

The Legislature has in the past appropriated this sum for the intenance of the Hospital, which cannot be made self-sustaining if are to place the advantages of the best medical and surgical as-  
ance within the reach of sick students and citizens of the State at derate prices. There is never a time when all students of the Uni-  
versity are well, and the Hospital has often proved to be indispensa-  
ble and it has saved the lives of several students every year. In return  
the expenditures which have been made for its maintenance, the  
lents in the Medical Department have the advantages of the clinics  
which the Hospital affords.

**Contingent Fund ..... \$10,000**

It is impossible for any one to foresee, during the session of the legislature, all the needs that may arise in the course of two years of large a university. It has been the habit of the Legislature to make an appropriation for emergencies, and we request the amount mentioned for that purpose.

**General Library ..... \$25,000**

(Including salaries of the library staff.)

After the payment of salaries to teachers, the most important provision for the carrying on of satisfactory instruction for our students is reasonable equipment in the form of books and laboratory apparatus. The amount asked for above is the minimum which, in judgment of the Curators, will suffice for the maintenance of the General Library for two years. The amount appropriated will have to be divided among the following departmental libraries: Anatomy, Astronomy, Botany, Chemistry, Economics, Elocution, English, Geology, Mineralogy, German, Greek, French, History, History of Art, Library of Education, Italian, Latin, Mathematics, Physiology, Political Science, Sociology, Spanish, Theory and Practice of Art, Theory of Teaching, and Zoology. After the payment of the salaries of the library staff, the amount to be distributed to each of these departments for the purchase of books and periodicals, will be very small, we urgently request that the amount mentioned be appropriated.

**Science Laboratories ..... \$25,000**

The provision for laboratories is of similar importance to that for library, and we ask this sum for the laboratories of Anatomy, As-

tronomy, Bacteriology, Botany, Chemistry, Experimental Psychology, Geology and Mineralogy, Home Economics, Manual Training, Physics, Physiology, and Zoology, and for the salary of the Mechanician to repair apparatus. It should be remembered that each of these laboratories includes several rooms, and that the above amount, when distributed among all the science laboratories, will mean a small appropriation to each.

7. **Museums** ..... \$5,000

The museums of Archaeology, Art, Education, Ethnology, Geology, Mathematics and Zoology are in need of additional equipment, as they have for the most part been greatly neglected, and they can be made valuable aids in the instruction of students in these several lines of work.

8. **Student Labor** ..... \$10,000

We ask this appropriation from the Legislature in order that the University may help students, both men and women, who are striving for an education and have to pay their own expenses. This money will be paid for work done in the offices and mailing rooms of the University, and on the horticultural grounds and experimental farm.

9. **Fellowships and Scholarships** ..... \$4,000

This amount has been appropriated by former Legislatures to enable young men and women of brilliancy to prosecute advanced studies at the University, while giving some return to the institution in reading exercises, examining laboratory books, dealing out supplies, etc.

10. **Publishing and Advertising** ..... \$10,000

We ask for this amount in order to be able to publish bulletins for distribution to teachers, containing suggestions for the improvement of their work; to high school seniors, calling their attention to the several lines of study open to them at the University; to young men on the farms, presenting the cause of scientific agriculture and the facilities offered for the study of the various phases of agriculture here; and for the publication of the results of investigations of concern to the people of the State.

11. **Printing Plant** ..... \$7,000

The possession of a printing plant would probably enable the University to save the State some expense in its publications in the

ture, and would be of convenience, especially in connection with the training of students of Journalism in the practical phases of their future work.

**Grading, Granitoid and Improvement of Grounds..... \$5,000**

It is hoped that the Legislature will permit this work already begun in improving the condition of the walks and grounds about the University, to be continued. We, therefore, ask for the small amount above mentioned to carry on some work of this sort during the next two years.

The citizens of Columbia have begun the paving of their streets, several of the streets around the grounds of the University have been paved in brick, to the great advantage of the University and the State. The sum due on this account to the contractors is about \$27,000, and this amount should be paid by the State.

**Repairs and Improvement of Buildings..... \$10,000**

There is constant need of repairs on the older buildings of the University, and improvements should at times be made in some of them to permit the use of space not originally adapted to or prepared for class room use. The rapid increase of students without corresponding additions to our buildings renders it necessary to utilize every available foot of space that can possibly be put in shape for class rooms or laboratories, and we request the appropriation of the full amount mentioned for repairs and improvements of existing buildings. The amount seems very reasonable when the fact is considered that there are at Columbia twenty-five University buildings with a capacity of 5,600,000 cubic feet.

**Extension Work ..... \$10,000**

A State University cannot adequately serve the people without provision for lectures at various centers of the State to farmers, teachers, and others interested in the improvement of social and economic conditions. Other universities are spending large sums of money on this important work, notably Cornell University, and the University of Wisconsin, each of which spend about \$50,000 a year on extension teaching. We ask that the sum of \$10,000 be appropriated toward the carrying on of this work for the next two years.

**15. Equipment for Men's Gymnasium..... \$5,000**

We request this amount in order to provide lockers and some additional apparatus in the gymnasium for men. At present we are

forced to employ a student to guard the clothing of other students while engaged in exercise in the gymnasium, and the limited apparatus makes small sections of classes necessary, and thus increases the expense of administration of the department of physical education.

16. **Light and Heat Station..... \$25,000**

The boilers and some other equipment have been in use for about fifteen years, and will need to be replaced during this biennial period. An additional deep well and new reservoir, together with an additional service pump, are needed if the University is to be independent of the town of Columbia for water supply. Additional wiring and fixtures for electric light should be provided, so as to render the University independent of the town in the matter of light for all buildings.

## **DEPARTMENTS.**

### **17. (a) College of Arts and Science.**

**Additional Teachers and Assistants..... \$15,000**

As practically all students of the University give some portion of their time—varying from one-third in the Schools of Agriculture and Engineering to two-thirds in the Teachers College and School of Journalism—to courses in Arts and Science, the demand for additional teachers is always most keenly felt in this College. Then, too, the growth in enrollment has been marked within the College itself, and in justice to the young men and women for whose benefit the instruction is offered, we request the above amount to provide for additional teachers, so as to prevent overcrowding of classes or the exclusion of some students from the courses they seek to pursue.

### **18. (b) Teachers College.**

**(1) Additional Teachers and Assistants..... \$7,000**

The teaching staff of this College is really less than two years ago. Professor Hill resigned his chair of Educational Psychology in June, 1907, and it was filled temporarily last year. This year he is giving some time to instruction in this subject, but his duties as President of the University make it impossible for him to do much teaching, and there is need of a Professor or Assistant Professor in this phase of Education. The departments of Drawing, Manual Training and Music are also in need of additional assistance to meet the pressing demand for trained teachers in these lines.

**(2) Equipment in Manual Training and in the Practice School..... \$3,000**

With the growth of the Teachers College has come of necessity a growth in the Practice School, where prospective teachers learn the practical side of the art of teaching. This calls for more books in the library of that School, and more equipment in the laboratories as well as additions to the furniture. The department of Manual Training

has an equipment that is not equal to that of many high schools which expect us to train their teachers, and we request an appropriation to enable us to correct this situation.

19. (c) **The College of Agriculture and Experiment Station.**

(1) **State Soil Survey..... \$15,000**

The preliminary survey of the Ozark region, forty-nine counties, is complete and ready for publication. The survey of the prairie section of Northeast Missouri, twenty-four counties, is also practically completed. A detailed survey of the soils of four counties, viz: Audrain, Barton, DeKalb and Sullivan, has been completed. Such a survey as is now being conducted by the College, needs to be done but once in the history of the State. It is of prime importance, however, that it be done now, in order that the State's largest asset, the plant food in its soil, may not be further wasted, through lack of knowledge of what our different types of soil contain, what they are best adapted to, and how their fertility may be best maintained. To continue this work on its present basis will require for two years the sum of \$15,000.

(2) **Hog Cholera Serum..... \$10,000**

The loss to Missouri farmers from hog cholera alone amounts to from one to two million dollars per year. Through the investigations of the United States Government and of the Missouri Experiment Station, a method of successful control of this disease, through a serum which, when injected into healthy animals, renders them immune against cholera, has been developed. By this means it is believed that cholera may be effectually controlled and this great waste practically stopped. The disease breaks out suddenly in a community, and if left alone spreads rapidly. To meet these emergencies it is necessary to keep a large supply of serum constantly on hand. A long time and quite expensive material are required for the production of this serum. It will be necessary, therefore, in order to prevent the loss from hog cholera, for the State to engage in the production and dissemination of this serum. For this purpose an appropriation is required for two years of \$10,000.

(3) **Short Courses in Agriculture..... \$10,000**

Now that the College has its instruction in Agriculture of collegiate grade on a splendid footing, it is believed that a great service may be rendered the farmers of the State by arranging a series of Short Courses adapted to the immediate needs of the young men

id young women who have only a district school education. There e perhaps more than 50,000 young men in Missouri today who have completed the district school and will at once begin their career farmers. To reach these men with the more practical and necessary information which the College is able to impart would con r the greatest possible benefit upon the commonwealth. It is proposed, therefore, to organize a series of short courses of four or five months duration, so correlated that the student may attend profitably ne session, or continue for three or four years without covering the me ground. At the outset it is estimated that the facilities already ssessed by the College and to be provided for by the fund requested rom this Legislature, will be sufficient to organize this work, in case he necessary teachers are supplied. For the additional teachers eeded for two years an appropriation is requested of \$10,000.

i) Tests of Soils and Crops in the Different Counties of the

State. . . . . \$15,000

Already experiments of this sort, conducted by the College, are progress in 92 of the 114 counties. It is important that this work extended so as to include every county, and in many counties the aracter of the work should be enlarged and improved. To main in this work, with slight extensions, will require for two years the m of \$15,000.

i) Animal Husbandry, Including the Purchase of Addi-  
tional Live Stock. . . . .

\$20,000

The record of the fat stock, fed mainly by students and ex bited at the leading fat stock shows of the United States, has ought credit to the College and the State. Missouri is perhaps e leading live stock State in the Union. To provide better facili s for instruction in this important branch and to continue the ork of the Animal Husbandry Department, including the means r the purchase of additional live stock, an appropriation will be quired for the biennial period of \$20,000.

) The Experiment Station. . . . . \$25,000

The farmers of Missouri have during the past twenty years rived a large benefit from the experiments conducted by the issouri Experiment Station, supported largely by the federal govenment. Of late years, the State has been supplementing the fed al funds with a small appropriaion. The last General Assembly

appropriated the sum of \$25,000 for this purpose, and it is requested that for the next biennium an appropriation of a similar sum be made, \$25,000.

(7) Additional Teachers for College Students..... \$10,000

The proportionate increase in enrollment in the College of Agriculture is larger than in any other Department of the University, and to take care of this increase and to maintain the work on its present high plane, it will be necessary to employ additional teachers. For this purpose will be required for two years the sum of \$10,000.

(8) Library. .... \$3,000

Satisfactory instruction and experimentation can not be conducted without funds for the purchase of books. It is necessary for the man who is to make investigation to know what has already been done and what men in all parts of the civilized world are doing in his line. For the further development and completion of the College and Station Library is needed the sum of \$3,000.

(9) Furniture and Equipment for the Agricultural Building. .... \$15,000

The 44th General Assembly, in making an appropriation for an Agricultural Building, made no provision for furnishing or equipping it. It is estimated that for equipping the building with the necessary laboratory desks, apparatus, hoods, furniture, etc., will be required the sum of \$15,000.

(10) Veterinary Hospital. .... \$20,000

Some of the most important discoveries in animal diseases have been made by the Veterinary Department of the College. The department, however, is practically without equipment of buildings, laboratories, hospitals and barns. It is necessary either to bring the diseased animals used by the Veterinary Department for study and investigation into the same building where the blooded live stock of the College is being used for judging, with the constant danger of communicating infectious diseases to these valuable animals, or else the instruction in Veterinary Medicine and Surgery, and the experiments in this important line must be conducted out of doors. The 43rd General Assembly made an appropriation of \$15,000 for

This purpose, chargeable to the fund arising from taxes on collateral inheritances. As there was not sufficient money paid into this fund to meet the appropriations, the building was not erected. The 45th Assembly is earnestly requested to appropriate for this purpose the sum of \$20,000.

(1) **Dairy Barn** . . . . . \$10,000

The College has one of the very best dairy herds in America, not in the world. More high producing cows were developed in this herd last year than in any other herd in the world, yet the barn in which these valuable cows are kept is old, unsanitary, dilapidated and wholly unsuited to the needs of the poorest private dairyman, much less the Missouri College of Agriculture. The dairymen of Missouri demand a barn that shall serve as a model and that shall be in keeping with the other buildings of the College and suitable for the housing of these hundred most valuable dairy animals. A modest estimate of the amount required for this purpose is \$10,000.

(2) **Power Plant on the Horticultural Grounds** . . . . . \$15,000

The present power plant on the Horticultural grounds has been entirely outgrown, the boilers are practically worn out, and in order to heat the new Agricultural Building, Horticultural Building and Caud Hall it will be necessary to erect a new power plant. For this building, necessary boilers, etc., will be required the sum of \$5,000.

(3) **Horse Barn** . . . . . \$7,000

Missouri is one of the leading horse-rearing states of the Union. At the present time some of the valuable horses of the College are interbred with the beef cattle, some with the dairy herd, and others are without adequate protection. The College should engage in experiments in horse breeding, feeding and management, but at the present time has no suitable building for this purpose. It is recommended, therefore, that the Legislature provide for a horse barn the sum of \$7,000.

(4) **Live Stock Judging Pavilion** . . . . . \$12,000

The present Live Stock Judging Pavilion is so far outgrown that student judging exercises are conducted in the Farm Machinery Laboratory, the different barns, and in many cases out of doors.

Since the present pavilion was erected the enrollment in the College of Agriculture has trebled. An additional pavilion is necessary, even though the present one were ample in size, because it occurs almost daily that two or even three sections of students are receiving instruction in judging different classes of stock at the same time. For the erection of an additional Live Stock Judging Pavilion it is estimated that an appropriation will be required of \$12,000.

20. (d) **Law Department.**

- (1) **Law Library** ..... \$5,000

This sum is needed to increase the Law Library so as to make it more useful to the students and to administer it during two years.

- (2) **Special Lectures** ..... \$1,000

It is advisable to have a few men of prominence in their profession come to Columbia every year to lecture for a few days each to our law students, and this small amount is requested so as to be able to defray the traveling expenses of these lecturers.

21. (e) **Medical Department.**

- (1) **Improvements in the Hospital**.....\$5,000

This amount is needed to provide an addition for Operating Room, Dispensary, and Isolation Ward, to furnish a refrigerating plant, and laundry equipment which would enable the Hospital to have the laundry work done for the patients at much less cost than is possible when we have to rely on one of the laundries in town to do it.

- (2) **Medical Library.** . ....\$3,000

Special books for the library in Medicine are needed for consultation by both students and teachers, and as these are expensive the amount asked for is the minimum on which it would be possible to provide for the purchase of books and the care of the library for two years.

- (3) **Improvement of Clinical Instruction**.....\$10,000

For the practical training of physicians nothing is of greater importance than good clinical facilities, and these cannot be provided at the expense of the patients, but the State must support

ome free beds in the Hospital and furnish the laboratory equipment necessary for the purpose. The greatest weakness of our Medical Department is in the field of clinical instruction, and this modest sum is requested so that the Board will be in a position to strengthen this phase of the work.

**1) Medical Building. . . . . \$50,000**

There has been some agitation in favor of establishing the last two years of the medical course in one of the large cities of the State in order to get access to large hospitals for clinical instruction. Should the Legislature approve of this plan, it will be necessary to provide a building for the laboratories of Pathology, Surgery, etc. Several proposals have been made to us by men representing medical interests in these cities, and in order that the Board may be able to make arrangements on favorable terms for the development of clinical instruction in one of them, the amount above mentioned is asked for as a minimum for building purposes. Should the plan not meet with the approval of the Legislature, the same amount will be needed to extend the Parker Memorial Hospital and increase greatly the number of free beds so as to secure clinical patients.

**22. (f) Department of Engineering.**

1) Additional equipment.....	\$35,000
2) Additional teachers.....	7,000
3) Books and periodicals.....	8,000
4) Engineering Experiment Station.....	10,000

Over five hundred young men are striving each year for technical training in our Department of Engineering in order to fit themselves for industrial work.

The class rooms, drawing rooms and shops of this department are overcrowded and the possibility of the removal of the Physics Department from the Engineering Building will be only a temporary relief, and this only so far as class rooms and drawing rooms are concerned, providing no additional space for shops and laboratories.

The amounts requested for additional equipment and additional teaching force will enable us to better care for the students we now have, but are really not adequate for the increase in students which we may reasonably expect during the coming biennial period.

The Engineering Library is inadequate to our present needs

and the sum of \$3,000 is earnestly requested for much needed engineering books and periodicals.

There seems no reason to doubt that the State would be benefited by an Engineering Experiment Station just as it has been benefited by the Agricultural Experiment Station. The enormous natural resources of the State of Missouri have hardly been definitely located, much less exhausted. Many problems need investigation, such as those connected with the heating, lighting, ventilation and sanitation of buildings and homes and with our water power and electricity supply. Tests should be made of our building materials, timber, brick and stone and of our road and paving materials. No problems are of more importance to the material interests of the State than those connected with the conservation of our natural resources and the economical and efficient utilization of them. In establishing an Engineering Experiment Station it is proposed to investigate and disseminate information first about such of these problems as will be of most immediate use and value to the people of the State. It is evident that \$10,000 for the biennial period will serve only to make a beginning in such a large undertaking. It is hoped, however, that the United States Government will aid in such work by grants for engineering experiment stations.

**23. (g) Missouri State Military School.**

**Uniforms .....** \$10,000

Even if the number of Cadets shows no increase during this biennial period, which is very unlikely, the amount asked for will be barely sufficient to cover the cost of necessary uniforms.

**Buildings.**

The following buildings are needed for the use of several Departments, as students of Agriculture, Arts and Science, Engineering, Medicine, etc., are required to pursue courses that will involve the use of them quite as much as of the buildings that are assigned to their respective Departments. They cannot therefore be classed with the needs of any one Department of the University.

**24. Library Building .....** \$250,000

It is largely in the interest of economy for the State that we urgently request the appropriation of a sum sufficient to construct a fire proof building for storing the books and pamphlets belonging to the University and to the State Historical Society, and one

ge enough to provide for the satisfactory use of these collections by the students of the University and citizens of the State. At present these collections are scattered through all the buildings and are exposed to the risk of fire. They are now worth in the neighborhood of \$200,000, and it is poor economy to take the risk of losing them. Besides, some of the collections could not be replaced for any sum of money. In addition to the importance of such a building to save the State a large possible loss, we would so urge that from the standpoint of efficient work in the University no building can be of greater importance to our students who use constantly use books and documents.

**Physics Laboratory ..... \$100,000**

The Forty-second General Assembly appropriated \$75,000 for the erection of a Physics Building, but the amount accruing from the collateral inheritance tax for the years 1903 and 1904 fell far short of expectations, and it was not built. Instruction in Physics is still carried on in the Engineering Building, which has steadily become more crowded, and is thoroughly unsuited for the teaching of Physics. In the meantime, the department has grown to much larger proportions, and the amount mentioned is small enough for the erection of a building that would prove adequate for the next five years.

**Chemistry Building ..... \$75,000**

The Forty-second General Assembly also appropriated the sum of \$35,000 to provide an addition to the Chemistry Building, but the University failed to secure the building for the same reason mentioned in the case of Physics. The small building now in use, which is erected at a time when the University did not have as many students in all Departments as are now enrolled in Chemistry alone, altogether inadequate, as well as ill adapted to its purposes, and would be wiser to erect a new building and turn the old one over to other uses; but if this cannot be done, we urgently request the Forty-fifth General Assembly to appropriate the amount of \$35,000 as an addition to the present building to carry out the intention of the Forty-second General Assembly.

**Women's Gymnasium ..... \$50,000**

It is the desire of the Board of Curators to make proper provision for the physical welfare of the women who attend the University, as well as to place them in other respects on a complete equality

of opportunity with the men. The cramped floor space of the room in Academic Hall, which is now used for a Women's Gymnasium, as well as the limited bathing facilities, constitute serious obstacles to any solution of this problem. With an enrollment of women students of nearly six hundred, we have facilities to provide for the physical welfare of not over two hundred. We, therefore, request the appropriation of the amount mentioned to build a Gymnasium for Women.

## 28. Fire Escapes.

By acts of former General Assemblies, the University is required to construct a number of fire escapes on various buildings. No fire escapes have been constructed in accordance with the provisions of these acts, for the reason that no funds have been provided by the Legislature for the purpose. It will cost approximately \$8,000 to comply with the law, and if that is to be done, the Forty-fifth General Assembly will find it necessary to make an appropriation for that purpose.

### Summary of Needs of Departments at Columbia.

Maintenance . . . . .	\$615,000
Summer Session . . . . .	20,000

**B. School of Mines and Metallurgy (at Rolla).**

Elsewhere in this volume will be found a report on the School of Mines and Metallurgy at Rolla, and a statement of its needs during the biennial period beginning January 1, 1909.

**Reports of Other Bodies.**

The report of the Board of Visitors was, at their request, published separately, and forwarded to the Governor and members of the General Assembly.

Very respectfully yours,

C. B. FARIS,

President of the Board of Curators.

January 1, 1909.

**REPORT OF THE SECRETARY OF THE BOARD OF CURATORS FOR THE BIENNIAL PERIOD ENDING DECEMBER 31, 1908.**

---

Columbia, Missouri, January 1, 1909.

To the Curators of the University of Missouri.

Gentlemen: Complying with the requirement of section 104<sup>84</sup> of the Revised Statutes of Missouri, 1899, I have the honor to submit herewith a report for the biennial period beginning January 1, 1907.

This report contains the following:

- I. The appropriations made by the Forty-fourth General Assembly for the departments of the University at Columbia and the receipts for the Biennial Period.
- II. Disbursements for 1907 and 1908.
- III. Summary of disbursements for 1907 and 1908.
- IV. Report of Treasurer of the Board of Curators.
- V. Salaries paid teachers and officers.
- VI. Students attending the University at Columbia during the biennial period.
- VII. Report of the School of Mines and Metallurgy.

Respectfully submitted,

**J. G. Babb,  
Secretary Board of Curators.**

**APPROPRIATIONS MADE BY THE FORTY-FOURTH GENERAL ASSEMBLY TO  
THE UNIVERSITY AT COLUMBIA.**

1283	Whitall Tatum Co., laboratory supplies.....	8 10	
1284	Patterson Bain, Jr. work for Astronomy .....	8 00	
1285	S. Calvert, analysis of cement .....	8 00	
1286	Harvard University, astronomical telegrams..	7 05	
1287	The Ashcroft Mfg. Co., 2 indicator springs.....	7 03	
1288	C. D. Mann, work for Astronomy .....	7 00	
1289	Riehle Bros. Testing Mach. Co. C. E. equipment.....	7 00	
1290	Buffalo Dental Mfg. Co., supplies for Physiology.....	7 00	
1291	The Yale & Towne Mfg. Co., 1 doz. keys.....	6 60	
1292	Walter McN. Miller, cash spent for lab .....	6 36	
1293	R. F. Rogers, dry goods.....	6 25	

## DISBURSEMENTS FOR 1908—Continued.

To whom issued.	Amount.	Total.
Inland Type Foundry, type for Mech. Drawing.....	6 18	
Arthur H. Thomas Co., supplies for Bact.....	6 16	
The Elec. Storage Battery Co., glass jars.....	5 76	
F. Behrend, 1 storage vessel.....	5 75	
Irwin Dunbar, 36½ hrs. carpenter work.....	5 47	
Northern Electrical Mfg. Co., E. E. supplies.....	5 40	
The Standard Calorimeter Co., chemicals.....	5 20	
B. F. McCurdy, live frogs.....	5 00	
Sharp & Smith, 1 stethoscope.....	4 90	
Dr. H. M. Alexander, 50 guinea pigs.....	4 00	
The Kny Scheerer Co., 5 cat skulls.....	3 75	
Harlow Shapley, work for Astronomy.....	3 60	
R. B. Gibson, cash expended for lab.....	2 85	
Louise Stanley, cash advanced for H. Economics.....	2 65	
Geo. T. Kline, salary.....	83 33	
W. H. Pike, salary.....	80 00	
Thos. Steer, 4 cadavers.....	80 00	
Nat'l Paper Co., paper, etc.....	51 65	
Central Scientific Co., equipment for Physics.....	45 75	
The Emerson Elec. Mfg. Co., 1 air pump and switch.....	45 68	
E. H. Sargent & Co., lab. supplies.....	40 00	
John W. Arnold, galv. iron boxes.....	36 00	
The Kny-Scheerer Co., wax models.....	33 90	
Elmer & Amend, supplies and equipment.....	33 22	
Ward, Leonard Elec. Co. 9 rheostats.....	32 54	
Jas. T. Daugherty, apparatus for Physiology.....	29 22	
W. B. Nowell, groceries.....	21 65	
Harlow Shapley, work for Astronomy.....	15 75	
H. W. Johns-Manville Co., asbestos fibre.....	15 00	
Mallinckrodt Chem. Wks., 2 cases ether.....	15 00	
Western Elec. Co., electrical supplies.....	13 67	
K. L. Chandler, groceries.....	13 35	
Harbison-Walker Refractories Co., 4 magnesites.....	9 14	
Nernst Lamp Co., repairs.....	8 75	
C. W. Furtney, fixtures, wiring, etc.....	7 95	
Weston Elec. Inst. Co., E. E. repairs.....	7 91	
Geo. Lefevre, cash advanced for lab.....	7 00	
Strawn, Holland D. G. Co., dry goods.....	6 43	
W. R. Nifong, distilled water.....	6 00	
Patterson Bain, Jr., work for Astronomy.....	5 85	
Schroeter Bros. Hardware Co., hardware.....	5 65	
Henry Heil Chem. Co., lab. supplies.....	5 50	
Inland Type Fdy., type for Mech. Dr.....	5 32	
B. F. McCurdy, live frogs.....	5 00	
A. C. Dixon, tool cases for shop.....	4 65	
C. D. Mann, work in Astronomy.....	3 75	
Heibel & Penn, denatured alcohol.....	3 20	
Irwin Dunbar, work in shop.....	3 15	
W. H. Porter Mfg. Co., 1 set tools.....	3 05	
C. C. Newman & Co., lab. supplies.....	3 03	
A. A. Spung, turtles.....	3 00	
Bausch & Lomb Opt. Co., lab. supplies.....	169 16	
Geo. T. Kline, salary.....	83 33	
W. H. Pike, salary.....	80 00	
Elmer & Amend, supplies and equipment.....	61 20	
E. H. Sargent Co., lab. equipment.....	55 86	
S. Shaw, 1 ink polygraph.....	52 80	
Meyer Bros. Drug Co., drugs, etc.....	52 19	

## DISBURSEMENTS FOR 1908—Continued.

No. Date	To whom issued.	Amount.	Total
2302	Thos. Steer, 2 cadavers.....	40 00	
2303	Ernst Leitz, laboratory equipment.....	33 86	
2304	The Standard Calorimeter Co. M. E. supplies.....	26 10	
2305	Chas. Matthews, hardware, etc.....	21 90	
2306	H. W. Cadwell, supplies for Zoology.....	19 75	
2307	Harlow Shapley, work for Astronomy.....	19 62	
2308	Peck Drug Co., drugs, etc .....	16 02	
2309	A. T. Thompson Co., stereopticon supplies.....	14 50	
2310	Whitall Tatum Co., supplies and equipment.....	13 38	
2311	Hatton & Knight, laboratory supplies.....	13 26	
2312	Erker Bros. Opt. Co., slides.....	11 20	
2313	Dr. Wm. R. Hubbert Serum Lab'y, 30 guinea pigs.....	10 50	
2314	The Grasselli Chem. Co., supplies.....	10 10	
2315	Central Scientific Co., 1 coil wire.....	10 00	
2316	Truax, Greene & Co., 1 stethoscope.....	9 00	
2317	Geller, Ward & Hasner, files, etc.....	8 10	
2318	Walter McN. Miller, cash expended for laboratory.....	7 51	
2319	H. Sydow, supplies for Botany.....	7 50	
2320	The Chas. A. Strelinger Co., supplies, etc.....	7 19	
2321	C. A. Whipple, carpenter work .....	5 40	
2322	Wilson-Maenlen Co. equipment .....	5 35	
2323	White Eagle Dairy Co., milk tickets.....	5 00	
2324	A. C. Dixon, supplies for shop.....	4 65	
2325	A. A. Sphung, 18 dozen turtles.....	4 50	
2326	Russell J. Hogg, lettering set.....	3 50	
2327	T. J. Rodhouse, materia furnished.....	3 45	
2328	Heibel & Penn, denatured alcohol.....	3 30	
2329	Ozark Pottery Co., 1 vase, F. H. Drawing.....	3 00	
2330	Waters-Pierce Oil Co., cyl. oil.....	2 98	
2330	G. T. Kline, salary.....	83 34	
2321	W. H. Pike, salary.....	80 00	
2322	The Grasselli Chemical Co., supplies for chem.....	147 84	
2323	Central Scientific Co., lab. equip. and supplies.....	62 02	
2324	Win. Gaertner & Co., equip. for Physics.....	45 55	
2325	Garden City Educ. Co., supplies for Man. Tr.....	36 84	
2326	Troy & Keith, lantern slides.....	29 00	
2327	Bausch & Lomb Opt. Co. laboratory equipment.....	27 81	
2328	M. H. Alexander, work for Int. Med.....	26 84	
2329	Eimer & Amend, apparatus and equipment.....	24 40	
2330	Fischer & Franke, 1 painting for Class Arch.....	24 00	
2331	Thomas Steer, 1 cadaver.....	20 00	
2332	Irwin Dunbar, work for Man. Tr.....	16 25	
2333	A. P. Weiss, lantern slides, etc.....	13 80	
2334	West's Machine Shop, equipment.....	13 30	
2335	H. Shapley, 52 hours in Observatory.....	13 00	
2336	W. H. Schultz, cash advances for Physiology.....	12 95	
2337	J. L. Douglass, photographs.....	12 50	
2338	C. H. Stoelting, 24 bunsen burners.....	11 85	
2339	Atkinson, Mentzer & Grover, supplies for Man. Tr.....	11 76	
2340	Mallinckrodt Chem. Works, 1 box chemicals.....	10 45	
2341	G. T. Swartz, work for Mech. Eng.....	9 90	
2342	James G. Biddle, E. E. supplies.....	9 38	
2343	Hibbard, Spencer, Bartlett Co., 5 band saws.....	6 58	
2344	The Electric Storage Battery Co., 1 carboy.....	6 25	
2345	Weston Electrical Inst. Co., repairing instruments.....	5 05	
2346	A. R. Lyon, eggs for Physiology .....	4 95	
2347	Foote Mineral Co., geological supplies.....	4 61	
2348	Geo. Lefevre, cash advances for Zoology.....	4 50	

## DISBURSEMENTS FOR 1908—Continued.

To whom issued.	Amount.	Total.
Heil Chem. Co., plaster paris.....	4 10	
tz, map work.....	4 00	
t Amend, apparatus and supplies.....	274 52	
bl, apparatus for Exp. Psychology.....	239 64

R. B. Price, Treasurer of the Board of Curators of the University of Missouri, being duly sworn, on his oath says that the above is a true and accurate account of the moneys received and disbursed by him as such Treasurer, for the biennial period ending December 31, 1906.

R. B. PRICE, Treasurer.

Subscribed and sworn to before me this 4th day of January, 1908. My term expires March 30, 1911.

(Seal)

MASON W. BELCHER, Notary Public,

## DEPARTMENTS AT COLUMBIA.

SALARIES—JANUARY 1, 1909.

## INSTRUCTION.

Professors.	
Paul Schweitzer, Professor of Agricultural Chemistry.....	\$1,200 00
A. W. McAlester, Professor of Surgery .....	2,250 00
Woodson Moss, Professor of the Practice of Medicine and Therapeutics.....	1,750 00
E. A. Allen, Professor of English Language and Literature.....	2,250 00
W. G. Manly, Professor of Greek Language and Literature.....	2,250 00
J. C. Jones, Professor of Latin Language and Literature.....	2,250 00
John W. Connaway, Professor of Comparative Medicine and Veterinarian to the Experiment Station .....	2,250 00
John D. Lawson, Professor of Contracts and International Law.....	3,000 00
John Pickard, Professor of Classical Archaeology and History of Art and Curator of the Museums of Art and Classical Archaeology.....	2,250 00
J. C. Whitten, Professor of Horticulture and Horticulturist to the Experi- ment Station .....	3,000 00
H. J. Waters, Professor of Agriculture.....	3,000 00
B. F. Hoffman, Professor of Germanic Languages.....	2,250 00
F. B. Mumford, Professor of Animal Husbandry and in charge of Animal Husbandry Department of Experiment Station.....	3,000 00
J. M. Stedman, Professor of Entomology and Entomologist to the Experi- ment Station .....	2,250 00
W. G. Brown, Professor of Chemistry and Director of the Laboratories.....	2,250 00
John R. Scott, Professor of Elocution.....	2,200 00
Isidor Loeb, Professor of Political Science and Public Law.....	3,000 00
C. F. Marbut, Professor of Geology and Mineralogy and Curator of the Geological Museum .....	2,250 00
H. B. Shaw, Professor of Electrical Engineering .....	2,250 00
George Lefevre, Professor of Zoology and Curator of the Zoological Museum .....	2,250 00
C. A. Ellwood, Professor of Sociology.....	2,250 00
C. W. Greene, Professor of Physiology and Pharmacology.....	2,250 00
Max Meyer, Professor of Experimental Psychology.....	2,250 00
C. W. Hetherington, Professor of Physical Training and Director of Gym- nasiums and Athletics .....	3,000 00
F. P. Spalding, Professor of Civil Engineering.....	2,700 00
F. H. Seares, Professor of Astronomy and Director of Laws Observatory..	2,700 00
L. M. Defoe, Professor of Mechanics in Engineering.....	2,500 00
C. M. Jackson, Professor of Anatomy and Histology.....	3,200 00
Walter McNab Miller, Professor of Pathology and Bacteriology.....	2,500 00
Max W. Meyer, Professor of Gynecology and Obstetrics.....	1,500 00
Guy L. Noyes, Professor of Diseases of the Eye and Ear.....	1,500 00
A. Ross Hill, Professor of Educational Psychology.....	3,000 00
E. W. Hinton, Professor of Pleading, Practice and Evidence.....	2,400 00
E. R. Hedrick, Professor of Mathematics.....	2,750 00
M. F. Miller, Professor of Agronomy and Curator of Agricultural Museum	2,400 00
H. B. Almstedt, Professor of Germanic Languages.....	2,300 00
O. M. Stewart, Professor of Physics.....	2,250 00
N. M. Trenholme, Professor of History.....	2,400 00
J. L. Merriam, Professor of Theory and Practice of Teaching.....	2,500 00
Joseph Frazier, Professor of Military Science and Tactics and Command- ant of Cadets .....	600 00
Sidney Calvert, Professor of Organic Chemistry.....	2,000 00
H. M. Belden, Professor of English Language and Literature.....	2,250 00
C. H. Eckles, Professor of Dairy Husbandry.....	2,400 00
Jonas Viles, Professor of American History.....	1,900 00
Herman Schlundt, Professor of Physical Chemistry.....	2,200 00
H. C. Hill, Professor of Corporation Law and Real Property.....	2,400 00

## SALARIES—JANUARY 1, 1909—Continued.

V. L. Howard, Professor of Horticulture (7-10).....	1,400 00
F. Trowbridge, Professor of Agricultural Chemistry and Chemist to the Experiment Station .....	2,400 00
V. C. Curtis, Professor of Zoology.....	2,200 00
V. H. Pommer, Professor of Music in the Teachers College.....	2,000 00
L. O. Lovejoy, Professor of Philosophy.....	2,500 00
Walter Williams, Professor of the History and Principles of Journalism..	2,850 00
I. J. Davenport, Professor of Economics.....	3,000 00
J. Stuart Gager, Professor of Botany.....	2,500 00
Percy Bordwell, Professor of Constitutional Law.....	2,000 00
Thomas A. Street, Professor of Equity.....	2,750 00
V. J. Calvert, Professor of Physical Diagnosis and Clinical Pathology.....	2,000 00
I. W. Hibbard, Professor of Mechanical Engineering.....	2,850 00

## Assistant Professors.

Eva Johnston, Assistant Professor of Latin.....	1,500 00
W. S. Williams, Assistant Professor of Topographic Engineering.....	1,800 00
A. L. Hyde, Assistant Professor of Bridge Engineering.....	1,800 00
Carolyn T. Stewart, Assistant Professor of Germanic Languages.....	1,500 00
J. S. Ankeney, Assistant Professor (in charge) of Free Hand Drawing....	1,750 00
J. H. Coursault, Assistant Professor of the History and Philosophy of Education .....	2,000 00
O. D. Kellogg, Assistant Professor of Mathematics.....	1,800 00
T. J. Rodhouse, Assistant Professor of Hydraulic Engineering in charge of Mechanical Drawing .....	1,800 00
Edna D. Day, Assistant Professor (in charge) of Home Economics.....	1,500 00
W. M. Dey, Assistant Professor of Romance Languages.....	1,800 00
M. S. Wildman, Assistant Professor of Economics.....	1,800 00
A. L. Westcott, Assistant Professor of Mechanical Engineering.....	1,500 00
L. D. Ames, Assistant Professor of Mathematics.....	1,500 00
H. L. Crosby, Assistant Professor of Greek.....	1,200 00
A. E. Flowers, Assistant Professor of Electrical Engineering.....	1,800 00
William A. Miller, Assistant Professor of Railway Engineering.....	1,500 00
A. H. R. Fairchild, Assistant Professor of English.....	925 00
T. J. Riley, Assistant Professor of Sociology.....	1,900 00
E. T. Bell, Assistant Professor of Anatomy.....	2,000 00
H. M. Reese, Assistant Professor of Physics.....	1,500 00
H. S. Philbrick, Assistant Professor of Mechanical Engineering, in charge of Shops .....	1,750 00
W. D. A. Westfall, Assistant Professor of Mathematics.....	1,400 00
E. A. Fessenden, Assistant Professor of Mechanical Engineering.....	1,500 00
George M. Reed, Assistant Professor of Botany.....	1,500 00
E. H. Schorer, Assistant Professor of Parasitology and Hygiene.....	1,500 00
J. D. Elliff, Inspector of Schools and Assistant Professor of School Administration (4-5).....	1,920 00
W. W. Charters, Assistant Professor of Education.....	2,000 00
R. B. Gibson, Assistant Professor of Physiological Chemistry.....	1,500 00
J. W. Hudson, Assistant Professor of Philosophy.....	1,500 00
Chester Murray, Assistant Professor of Romance Languages.....	1,500 00
Slas Bent, Assistant Professor of Theory and Practice of Journalism....	2,000 00

## Instructors.

Louis Ingold, Instructor in Mathematics.....	\$1,200 00
Caroline McGill, Instructor in Anatomy.....	1,000 00
C. C. Eckhardt, Instructor in History.....	1,000 00
H. V. Canter, Instructor in Latin.....	1,400 00
M. S. Bowen, Instructor in Shop Work.....	1,000 00
W. J. Monilaw, Instructor in Athletics.....	1,000 00
J. W. Putnam, Instructor in Economics.....	1,200 00
M. A. Shaw, Instructor in English.....	1,200 00
H. D. Carpenter, Instructor in Electrical Engineering.....	1,000 00

## SALARIES—JANUARY 1, 1909—Continued.

A. H. Welch, Instructor in Mechanical Drawing.....	1,200 00
J. R. Wharton, Instructor in Mechanical Engineering.....	1,200 00
E. A. Trowbridge, Instructor in Animal Husbandry.....	1,400 00
Helene M. Evers, Instructor in Romance Languages.....	1,000 00
Theodore E. Hamilton, Instructor in Romance Languages.....	1,000 00
J. A. Gibson, Instructor in Analytical Chemistry.....	1,400 00
R. W. Selvidge, Instructor in Manual Training.....	1,500 00
Francis W. Coker, Instructor in Political Science.....	1,000 00
Earl Querbach, Instructor in Bridge Engineering.....	1,000 00
Robert L. Ramsay, Instructor in English.....	1,200 00
Clarence Perkins, Instructor in European History.....	1,000 00
C. A. Willson, Instructor in Animal Husbandry.....	1,400 00
Louise Stanley, Instructor in Home Economics.....	1,200 00
Otto Dunkel, Instructor in Mathematics.....	1,200 00
E. S. Haynes, Instructor in Astronomy.....	1,000 00
L. L. Silverman, Instructor in Mathematics.....	800 00
T. W. Burckhalter, Instructor in Men's Gymnasium.....	1,800 00
Frank F. Stephens, Instructor in American History.....	1,100 00
J. F. McClelland, Instructor in Zoology.....	1,000 00
H. D. Hughes, Instructor in Agronomy.....	1,200 00
Lee S. Backus, Instructor in Veterinary Science.....	1,200 00
W. G. Bek, Instructor in Germanic Languages.....	1,000 00
W. C. Davidson, Instructor in Mechanical Drawing.....	1,000 00
E. A. Thurber, Instructor in English.....	1,600 00
G. C. Scoggin, Instructor (in charge) of Sanskrit and Comparative Philology.....	1,000 00
F. V. Emerson, Instructor in Geology.....	1,200 00
Mendel P. Weinbach, Instructor in Electrical Engineering.....	1,000 00
Charles G. Ross, Instructor in Journalism.....	1,500 00
G. S. Lowman, Instructor in Physical Education.....	1,800 00
W. H. Chandler, Instructor in Horticulture.....	1,400 00
R. D. Miller, Instructor in English .....	1,000 00
Charles A. Myers, Instructor in English.....	1,000 00
H. W. Gray, Instructor in Civil Engineering.....	1,200 00
George B. Mangold, Instructor in Sociology (1-5).....	300 00
Eugene Fair, Instructor in History.....	600 00
George E. Dutton, Instructor in English.....	825 00
H. C. Rentschler, Instructor in Physics.....	1,200 00
Frances R. Gardner, Instructor in the Women's Gymnasium.....	1,100 00
E. E. Morlan, Instructor in Chemistry.....	1,000 00
J. J. Steffens, Instructor in English.....	1,000 00
J. M. Wright, Substitute Instructor in American History.....	1,000 00

## Assistants.

Stanley Sisson, Assistant in Experimental Psychology.....	\$400 00
G. W. Tannreuther, Assistant in Zoology.....	200 00
Ernest Horn, Assistant in Education.....	600 00
Margaret Sinclair, Teacher in Elementary School.....	200 00
Edith Parker, Assistant in Manual Training.....	300 00
Merle Randall, Assistant in Chemistry.....	200 00
H. C. Philipp, Assistant in Physics.....	500 00
Anna Griffith, Teacher in Elementary School.....	600 00
Marion W. Hartwell, Assistant in Women's Gymnasium.....	800 00
L. G. Rinkle, Assistant in Dairy Husbandry.....	900 00
E. A. Cockefair, Assistant in Botany and Teacher of Agriculture in the Teachers College High School.....	500 00
C. R. Moulton, Assistant in Agricultural Chemistry.....	900 00
C. B. Hutchison, Assistant in Agronomy.....	800 00
L. F. Shackell, Assistant in Agricultural Chemistry.....	900 00
L. D. Haigh, Assistant in Agricultural Chemistry.....	1,000 00
J. R. Keithley, Assistant in Dairy Husbandry.....	700 00
Webster N. Jones, Assistant in Chemistry.....	300 00

## SALARIES—JANUARY 1, 1909—Continued.

a Estes, Assistant in Chemistry.....	300 00
llen, Assistant in Sociology.....	300 00
Shapley, Assistant in Laws Observatory.....	300 00
Moore, Assistant in Free Hand Drawing.....	300 00
H. Brooking, Assistant in Surveying.....	720 00
.. Briggs, Assistant in Physics.....	500 00
P. Rusk, Assistant in Animal Husbandry.....	800 00
Benton, Assistant Principal of Teachers College High School.....	800 00
Holt, Teacher in Teachers College High School.....	500 00
H. Mitchell, Assistant in Pathology and Anesthetist at Parker norial Hospital.....	750 00
eed, Assistant in Dairy Husbandry.....	800 00
I. Demaree, Assistant in Agronomy.....	800 00
K. Francis, Assistant Chemist to the Experiment Station and In- ctor in Agricultural Chemistry.....	900 00
W. Woodman, Research Assistant in Agricultural Chemistry....	300 00
E. Duffy, Assistant in Mechanical Engineering Shop Work.....	720 00
Reeder, Lecturer on Climatology.....	100 00
'emberton, Assistant in Mathematics.....	600 00
evers, Assistant in Germanic Languages.....	600 00
opkins, Principal of the Teachers College High School.....	800 00
Wible, Assistant in Mathematics.....	600 00
trion Hertig, Teacher in Elementary School.....	600 00
Jovie, Assistant in Botany.....	400 00
Rumbold, Assistant in Botany.....	500 00
Coffin, Assistant in Physiology.....	600 00

## Student Assistants and Problem Readers.

vans, Student Assistant in Journalism.....	300 00
H. Orr, Student Assistant in Journalism.....	250 00
. Schaefer, Student Assistant in Chemistry.....	150 00
gan, Student Assistant in Zoology.....	150 00
J. Weese, Student Assistant in Anatomy.....	150 00
sbit, Student Assistant in Home Economics.....	150 00
. Kunkel, Student Assistant in Botany.....	150 00
Keene, Student Assistant in Botany.....	150 00
ladfelter, Student Assistant in Mechanical Engineering.....	150 00
Joseph Bray, Student Assistant in Chemistry.....	150 00
elson, Student Assistant in Agronomy.....	150 00
ole, Student Assistant in Horticulture.....	150 00
W. Allen, Student Assistant in Horticulture.....	150 00
ausek, Laboratory Assistant in Shop Work.....	150 00
hartley, Student Assistant in Home Economics.....	150 00
De S. Boone, Student Assistant in Zoology.....	150 00
iversole, Student Assistant in Experimental Psychology.....	100 00
feiss, Student Assistant in Experimental Psychology.....	100 00
hwarze, Student Assistant in Botany.....	150 00
E. Thomas, Student Assistant in Botany.....	150 00
oard, Problem Reader in Mechanics.....	50 00
ann, Problem Reader in Mechanics.....	50 00
Wilkes, Problem Reader in Mechanics.....	50 00
hittenden, Problem Reader in Mathematics.....	75 00
art, Problem Reader in Mathematics.....	50 00
t Patterson, Problem Reader in Mathematics.....	50 00
leinz, Problem Reader in Mathematics.....	50 00
illian, Problem Reader in Mathematics.....	50 00

## Administration.

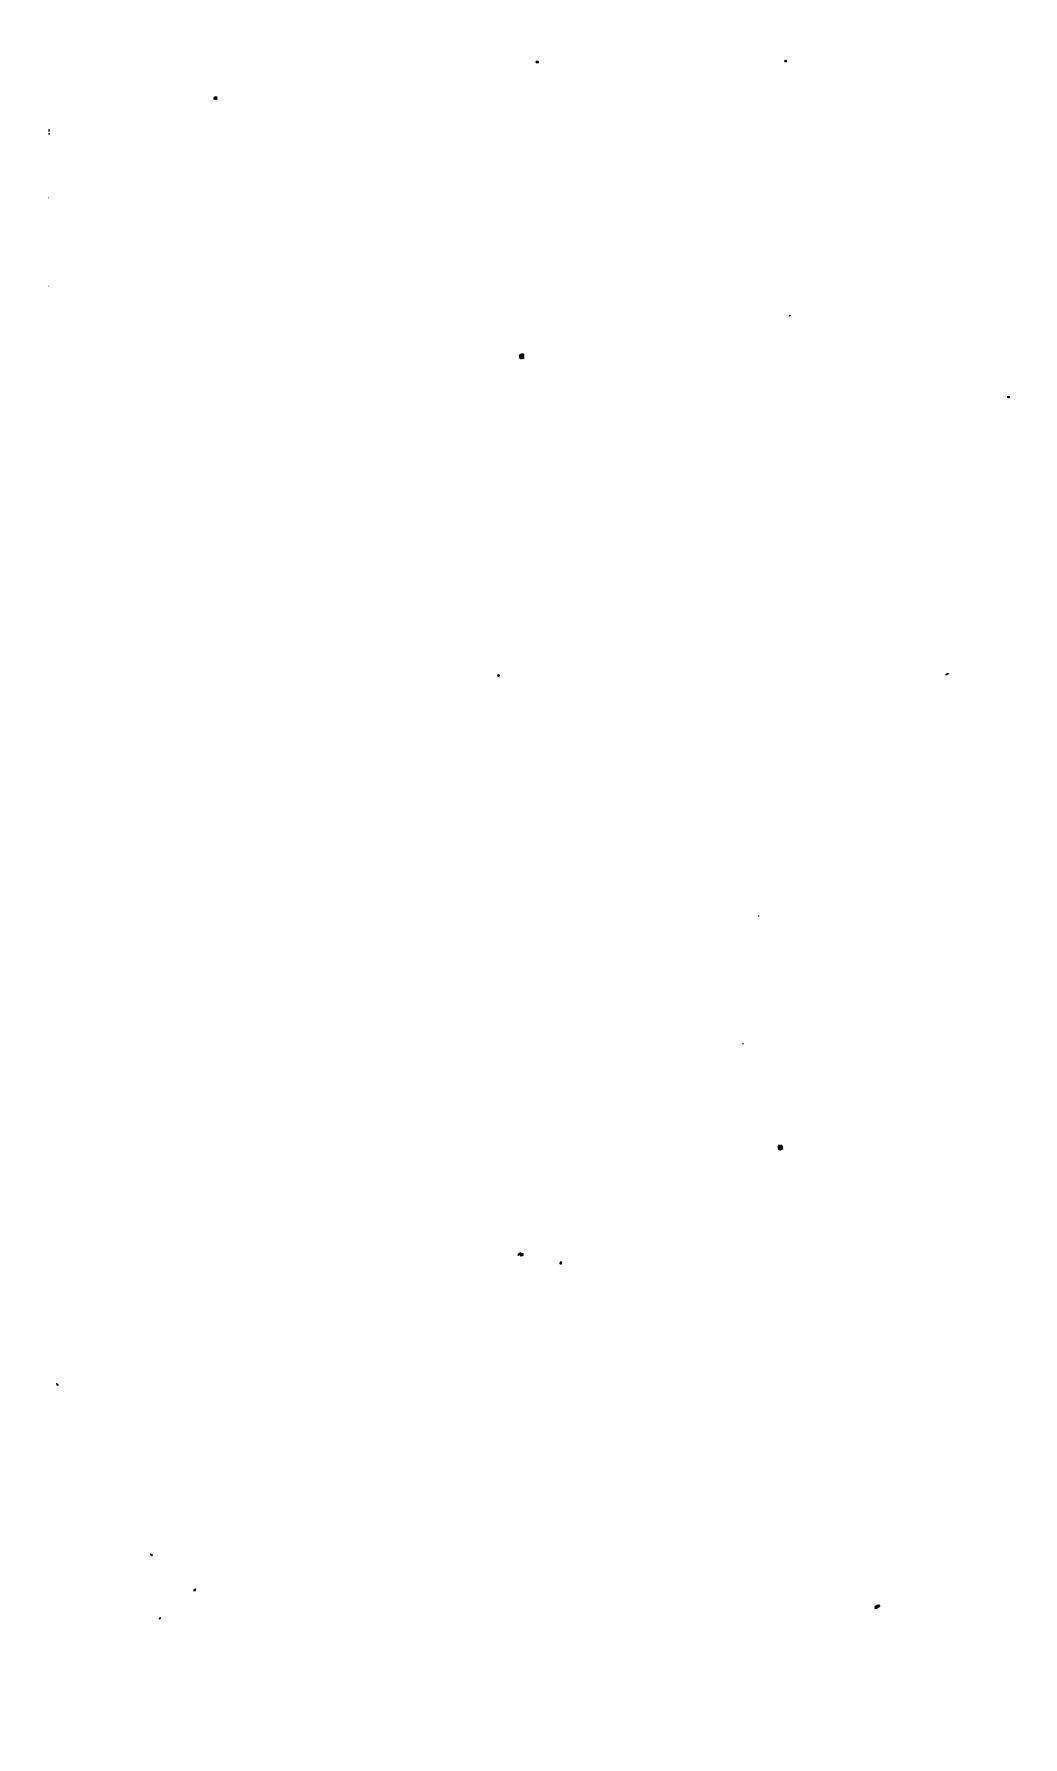

Hill, President of the University.....	\$3,000 00
McAlester, Dean of the Medical Department.....	450 00
ies, Dean of College of Arts and Science.....	750 00

## SALARIES—JANUARY 1, 1909—Continued.

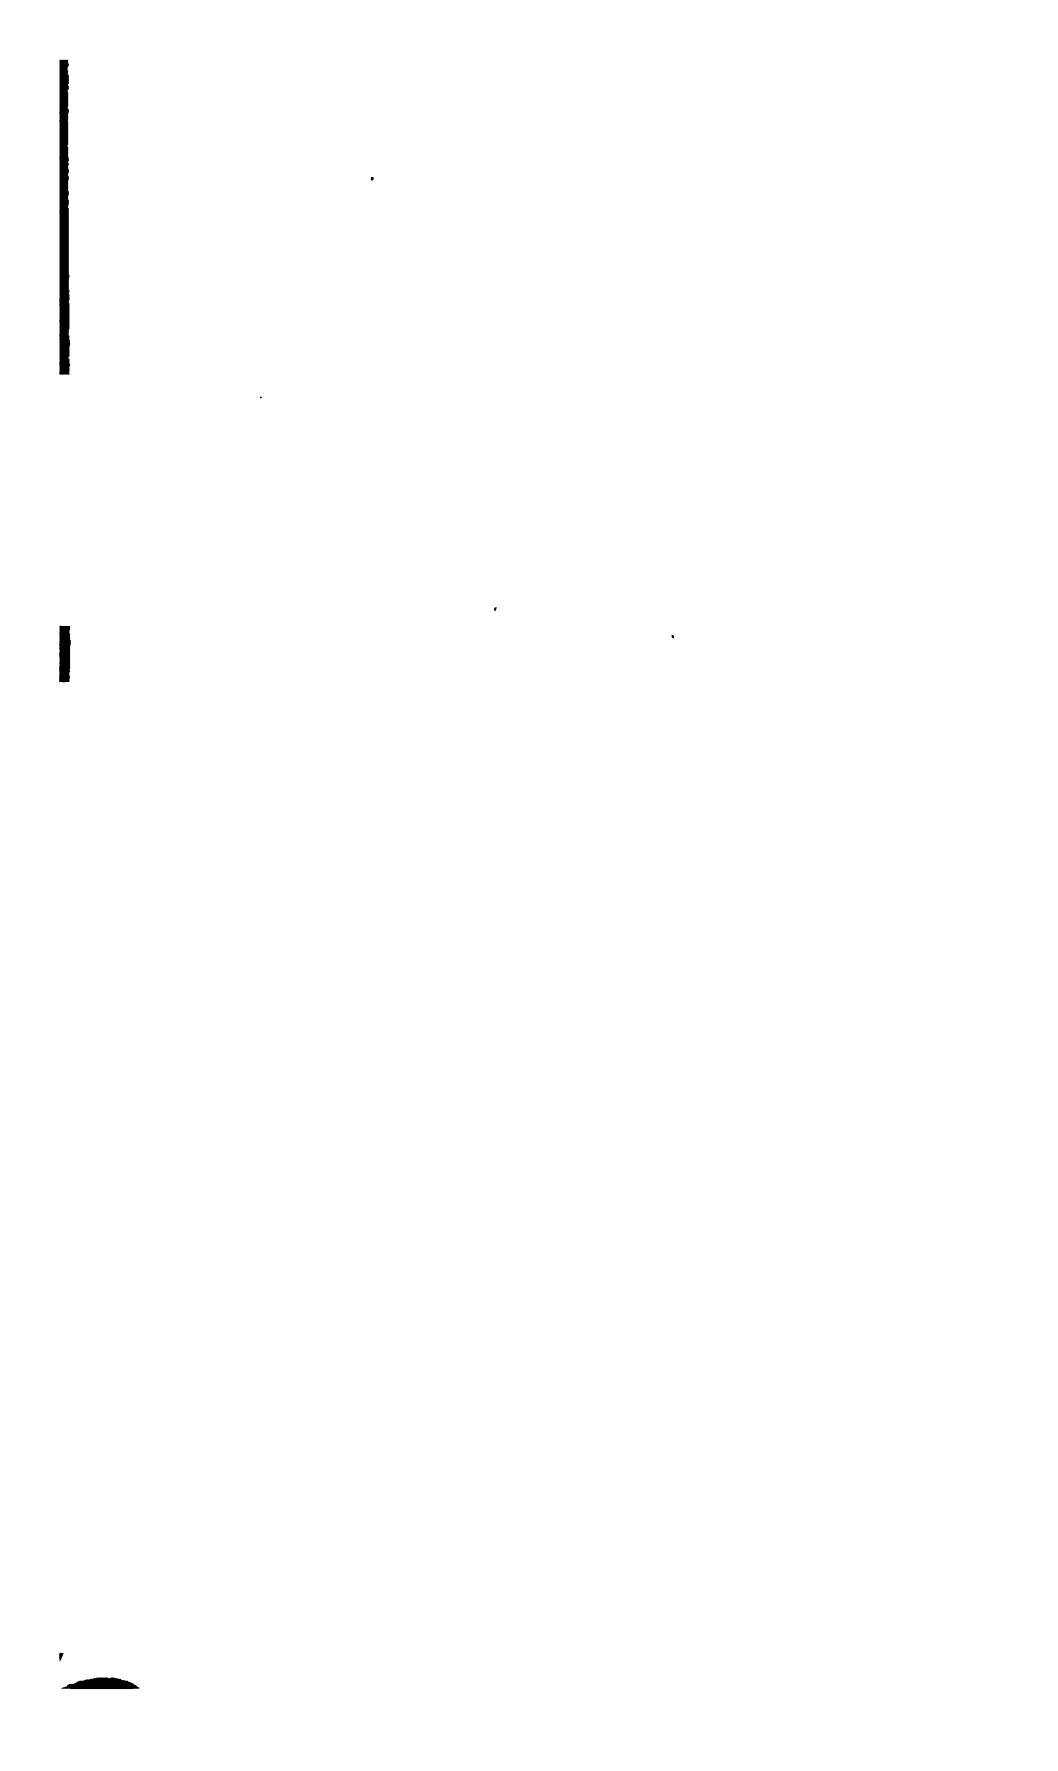

John D. Lawson, Dean of the Law Department.....	600 00
H. J. Waters, Dean of the College of Agriculture and Mechanic Arts and Director of the Experiment Station.....	1,000 00
C. M. Jackson, Junior Dean of the Medical Department.....	300 00
H. B. Shaw, Dean of the Engineering Department.....	450 00
Isidor Loeb, Acting Dean of the Teachers College, and Chairman of the Committee on Entrance .....	300 00
Walter Williams, Dean of the Department of Journalism.....	450 00
J. G. Babb, Secretary of the University.....	2,500 00
M. L. Lipscomb, Superintendent of Buildings and Grounds.....	2,300 00
H. O. Severance, Librarian of the University.....	2,000 00
F. M. Brown, General Attorney for the Collection of the Collateral Inheritance Tax (4-5) . .....	1,600 00
Mary B. Breed, Adviser of Women and Head of Read Hall.....	1,500 00
Irvin Switzler, Registrar of the University.....	1,400 00
J. A. Whitlow, Assistant Superintendent of Light and Heat Station.....	1,200 00
George T. Kline, Artist-Technician for the Laboratories of the University.	1,100 00
W. K. Stone, Assistant Librarian.....	1,000 00
J. W. Ammerman, Assistant to the Secretary of the University.....	1,000 00
Carl Dakan, Secretary to the President of the University.....	1,000 00
W. H. Pike, Mechanician for the Laboratories.....	950 00
Martha P. Fine, Assistant to the Secretary of the University.....	900 00
Burr H. Ozment, Director of the Cadet Band.....	900 00
John M. Evvard, Assistant to the Dean of the College of Agriculture.....	900 00
Josephine Shields, Superintendent of the Training School for Nurses.....	840 00
Arthur Rhys, Herdsman . .....	730 00
Estelle Hickok, Stenographer to the President and Official Stenographer of the University . .....	730 00
Mrs. Julia A. Watkins, Matron of Benton and Lathrop Halls, and the University Dining Club . .....	720 00
Clarence W. Sumner, Assistant in the Library.....	720 00
Grace Leffler, Cataloguer in the Library.....	720 00
Grace Phillips, in charge of Periodical Room, General Library.....	720 00
Sabra E. Kennedy, Stenographer to the Dean of the College of Agriculture	720 00
Bertha Bond, Cataloguer in the Library.....	600 00
Maude Higginbottom, Copyist in the Library.....	600 00
Mrs. L. N. Fitch, Matron of the University.....	600 00
Mrs. Ida Cunningham, Assistant Matron of the University.....	600 00
Bertha Eves, Stenographer at the Horticultural Building.....	600 00
Frances Wood Gove, Stenographer to the Dean of the Teachers College...	600 00
Cannie R. Quinn, Stenographer in the Department of Journalism.....	600 00
Carrie Bell, Stenographer to the Secretary of the University.....	540 00
Guy L. Noyes, Superintendent of Parker Memorial Hospital.....	500 00
Charles Thompson, Laboratory Assistant in Physics.....	500 00
J. S. McIntyre, Local Attorney in St. Louis for Collection of the Collateral Inheritance Tax (4-5).....	450 00
George H. English, Local Attorney in Kansas City and St. Joseph for the Collection of the Collateral Inheritance Tax (4-5).....	450 00
Mary R. Inman, Stenographer for Agronomy and Veterinary Science....	450 00
Edna Thornton, Stenographer to the Dean of the Medical Department.....	450 00
Leota Rodgers, Stenographer to the Department of Animal Husbandry....	450 00
Anna Beazley, Clerk and Stenographer of the Light and Heat Station....	450 00
Bessie E. Tiffey, Charging Clerk in Library.....	450 00
C. C. Freely, Storekeeper in Chemistry.....	450 00
G. V. McNallie, Secretary to the Director of Athletics.....	455 00
Marion Shaw, Assistant in Weather Bureau.....	300 00
Mabel Bailey, Stenographer for Veterinary Science and Dairy Husbandry (12).....	300 00
D. W. Work, Stenographer to the Dean of the Engineering Department...	300 00
W. F. Woodruff, Alumni Recorder.....	300 00
Noble L. Garrison, Stenographer to the Dean of the College of Arts and Science.....	250 00
Theodosia Wales, General Secretary of the Y. W. C. A.....	250 00

## SALARIES—JANUARY 1, 1909—Continued.

William W. Wright, Clerk of the Practice Court and Assistant Librarian..	225 00
Francis A. Benham, Stenographer to the Dean of the Law Department and Assistant Librarian ..	225 00
S. Perry Wilson, General Secretary of the Y. M. C. A.....	200 00
E. G. Spargo, Clerk in office of Dean of Engineering Department.....	180 00
J. H. Patrick, Student Assistant to Director of Athletics.....	170 00
R. B. Price, Treasurer of the University.....	150 00

# **REGISTER OF STUDENTS.**

## REGISTER OF STUDENTS.

er of students entering the University at Columbia from January 1, 1907, to the end  
lar session.

**SCHOOL OF MINES AND  
METALLURGY.**

## SUMMARY OF NEEDS OF SCHOOL OF MINES AND METALLURGY.

**Maintenance. . . . .** \$70,000

Since the last biennial appropriation the attendance at the School of Mines and Metallurgy has increased practically 20 per cent, while there has been a general trend upward of prices of supplies, repairs and other items of maintenance of more than 10 per cent. It has been necessary, in order to retain some very valuable men in the teaching force, to slightly increase salaries. This school received from the General Revenue fund two years ago the sum of \$50,000 for maintenance, which sum has been found to be inadequate.

**Equipment for Technical Laboratories. . . . .** \$15,000

(Including equipment for Ore Dressing, Electro-Metallurgy, Geology and Mineralogy, Mining, Mine Surveying, and Mining Machinery.)

The above equipment is necessary if this school is to do the best work in the several departments above mentioned, all of which are along the line of the special work that the school is designed and intended to do, and which it is doing.

**Enlargement and Equipment of Chemistry Laboratory. . . . .** \$8,000

(Including new plumbing, pipe fitting and fixtures.)

**Experimental Work in Ore Dressing, Mining and Metallurgy, \$5,000**

The necessity for carrying on the above work is apparent, since the aim of a School of Mines and Metallurgy is not alone to teach mining and its kindred subjects, but, in addition, is, if possible, by experimental work, to discover newer and more rapid and economical methods of separating the minerals from the rock containing them.

**Library and Library Books. . . . .** \$5,000

While this school has a small library well selected, yet an examination of the previous appropriations will show that comparatively speaking no excessive appropriations have ever been asked for the School of Mines by the Legislature.

**Fire Insurance. . . . .** \$2,500

The necessity for this item is apparent, unless the State should conclude that it is more economical for the State to carry the risk of loss by fire of its public buildings than to expend a small sum annually for fire insurance protection.

**Grading, Sidewalks and Campus Improvements. . . . .** \$5,000

The above item is made necessary by the fact that the surface of the campus of the School of Mines, particularly that portion there now being improved, is very irregular, and in order to bring it to trade and render convenient access to the buildings thereon, filling has been and will be required. The sum asked for will not be more than is necessary for this purpose, particularly should appropriation be made for the completion, as hereinafter requested, of the Ore Dressing Building.

**Enlargement and Equipment of Power Plant..... \$10,000**  
(Including power tunnel from power plant to buildings.)  
**Water Tank, Fire Apparatus and Sewerage Improvements, \$5,000**  
**Completion of Ore Dressing Building..... \$25,000**

This is an item of almost vital importance. The legislature appropriated in 1905 the sum of \$20,000 for an Ore Dressing Building. This sum has been expended—we think economically and wisely—and the State has gotten, in a partially complete building, most excellent value. We desired that the School of Mines might have as good a building for this work as the School of Mines of Utah or of Colorado has. Each of these States has provided for its School of Mines as good a building but no better than the one we are trying to get for the Missouri School of Mines. We designed to this end and to the end that we might have a modern building if not a model building. The \$20,000 given to us proved inadequate to do this and to make a complete building along the lines desired. We built well and finished a building, which is now in use, but to make a building such as we should have and such as we have planned for, and as was said “left room for” in the design and plans, will require the sum now asked.

In this connection it may be suggested that there is, based upon the proportion of one-fifth of the collateral inheritance tax to the School of Mines, now the sum of \$44,000, in the State treasury unappropriated, and arising from taxes paid in during the last biennial period.

REPORT OF THE SECRETARY OF THE EXECUTIVE  
COMMITTEE OF THE SCHOOL OF MINES AND  
METALLURGY FOR THE YEARS 1907 AND 1908.

Rolla, Missouri, January 1, 1909.

*To the Executive Committee of the School of Mines and Metallurgy:*

Gentlemen—In compliance with the requirements of the statutes of Missouri I have the honor to transmit herewith my report for the biennial period beginning January 1, 1907.

The report is made up as follows:

I. Appropriations made by the Forty-fourth General Assembly for the support and improvement of the school.

II. Disbursements for the years 1907 and 1908, under the appropriation for maintenance and out of moneys received from interest on state endowment, the Morrill fund, and from incidental sources.

III. Disbursements under the special appropriations from the Collateral Inheritance Tax fund.

IV. Summary of receipts and expenditures for the years 1907 and 1908.

V. Value of grounds, buildings and equipment.

VI. Disbursements under the special appropriations made by the Forty-third General Assembly.

VII. Salaries paid teachers, officers, and other employes.

VIII. Students attending the school during the biennial period.

J. A. DE LA VERGNE, JR.,  
Secretary Executive Committee.

### APPROPRIATIONS.

The Forty-fourth General Assembly appropriated for the support, maintenance and improvement of the School of Mines the sum of \$50,000.00, payable out of the State Revenue fund, not otherwise appropriated, and the following sums for the purposes stated, out of Seminary moneys and out of one-fifth of the moneys collected from Collateral Inheritance taxes (pages 40, 41 and 42 of Session Acts, 1907) :

'or general repairs.....	\$10,000 00
'or laboratory equipment.....	45,000 00
'or extending water works and high pressure pump.....	2,000 00
'or sidewalks.....	3,000 00
'or power, heating and lighting equipment of the ore dressing building.....	10,000 00
Appropriation for support, as above stated.....	\$70,000 00 50,000 00
Total appropriations.....	\$120,000 00

## SALARIES—GENERAL.

1906.

Number of Warrant.	To Whom Issued.	Purpose.	Amount.

10001-10015			
24-35	L. E. Young, et al.....	December salaries.....	2,564 00
	Total.....		\$30,846 56

1908.

113-138	L. E. Young, et al.....	January salaries.....	\$2,636 50
253-280	L. E. Young, et al.....	February salaries.....	2,666 50
410-429	L. E. Young, et al.....	March salaries.....	2,666 00
535-562	L. E. Young, et al.....	April salaries.....	2,631 50
661-691	L. E. Young, et al.....	May salaries.....	2,631 50
705-728	L. E. Young, et al.....	June salaries.....	2,662 43
854-875	L. E. Young, et al.....	July salaries.....	2,666 50
948-974	L. E. Young, et al.....	August salaries.....	2,631 50
1013-1069	L. E. Young, et al.....	September salaries.....	2,666 50
1079-1102	L. E. Young, et al.....	October salaries.....	2,629 93
1147-1171	L. E. Young, et al.....	November salaries.....	2,664 00
	Total.....		\$29,699 17

## Salaries of Student Assistants.

1907.

9126-9134	F. A. Moore, et al.....	January salaries.....	\$237 50
9212-9219	F. A. Moore, et al.....	February salaries.....	400 00
9340-9348	F. A. Moore, et al.....	March and April salaries.....	325 00
9422-9433	F. A. Moore, et al.....	May salaries.....	687 50
9710-9712	H. T. Mann et al.....	September salaries.....	75 00
9779-9781	H. T. Mann, et al.....	October salaries.....	150 00
9919-9937	H. T. Mann, et al.....	November salaries.....	350 00
17-22	H. T. Mann, et al.....	December salaries.....	158 35
	Total.....		\$2,383 35

1908.

Number of Warrant.	To Whom Issued.	Purpose.	Amount.
128-131	H. T. Mann; et al.	January salaries.....	\$100 00
268-274	H. T. Mann, et al.	February salaries.....	200 00
425-431	H. T. Mann, et al.	March salaries.....	150 00
550-556	H. T. Mann, et al.	April salaries.....	150 00
676-685	H. T. Mann, et al.	May salaries.....	525 00
1104-1110	A. L. Pollard, et al.	October salaries.....	175 00
1174-1180	A. L. Pollard, et al.	November salaries.....	175 00
	Total.....		\$1,475 00

**Wages of Assistants in the Library, the Chemical Laboratory and on Theme Work, Grades, etc.**

1907.

No. or. Ar.	To whom issued.	Purpose.	Amount.
5	W. S. Hall.....	Assistant in Library.....	\$38 00
6	F. A. Moore.....	Assistant in making grades.....	15 88
5	B. J. Snyder .....	80 hours correcting Themes.....	20 00
6	W. S. Hall.....	23 nights assistant in Library.....	11 50

## GENERAL REPAIRS.

The Forty-fourth General Assembly appropriated out of the State Seminary moneys and out of one-fifth of the tax derived from Intestate Inheritances, etc., for general repairs, the sum of \$10,000.

Upon properly recorded orders of the Executive Committee warrants have been issued and charged against said appropriation follows:

### General Repairs.

## LABORATORY EQUIPMENT.

The Forty-fourth General Assembly appropriated out of the State Seminary moneys and out of one-fifth of the tax derived from Collateral Inheritances, etc., for laboratory equipment and machinery for metallurgical assaying, ore dressing, electro-metallurgical, chemical, physical, geological, mineralogical and surveying laboratories, and wood and iron shops, the sum of \$45,000.

Upon properly recorded orders of the Executive Committee warrants have been issued and charged against said appropriation as follows:

## EXTENDING WATERWORKS AND HIGH-PRESSURE PUMP.

The Forty-fourth General Assembly appropriated out of the State Seminary moneys and out of one-fifth of the tax derived from Collateral Inheritance, etc., for extending waterworks and high-pressure pump, the sum of \$2,000.00. Upon properly recorded orders of the Executive Committee warrants have been issued and charged against said appropriation as follows:

### ORE DRESSING BUILDING.

The Forty-fourth General Assembly appropriated out of the State Seminary moneys and out of one-fifth of the money received from the Collateral Inheritance tax the sum of \$10,000 for power, heating and lighting equipment of the Ore Dressing and Metallurgical building.

Plans were prepared and the Executive Committee advertised for bids for the heating plant and the plumbing, drainage, etc., of said building. Eph Doherty of Kansas City, being the lowest bidder for the heating equipment, and Livesay and Walker of Rolla, Mo., being the lowest bidders for the plumbing, etc., the contracts were awarded them.

Pursuant to the recorded orders of the Executive Committee warrants have been issued and charged against said appropriation to date, as follows:

No. of War.	To whom issued.	Purpose.	Amount.
9098	Eph. Doherty . . . . .	First payment on contract . . . . .	\$2,000 00
104	Crane & Co. . . . .	Heating equipment . . . . .	34 48
221	The Wesco Supply Co. . . . .	Equipment . . . . .	341 21
222	Crane & Co. . . . .	Equipment . . . . .	33 74
223	J. A. Spilman . . . . .	Equipment . . . . .	145 18
294	C. J. & J. E. Briner . . . . .	Equipment . . . . .	167 05
295	Westinghouse Electric and Mfg. Co. . . . .	Equipment . . . . .	274 44
296	Northern Electric Mfg. Co. . . . .	Equipment . . . . .	138 00
297	Sprague Electric Co. . . . .	Equipment . . . . .	262 92
451	Northern Electric Mfg. Co. . . . .	Equipment . . . . .	88 00

No. of War.	To whom issued.	Purpose.	Amount.
571	H. E. Horman.....	Heating and power.....	\$50 40
693	Henry Wood.....	For labor, etc.....	1,411 38
749	Livesay & Walker.....	On contract.....	1,500 00
750	Chas. S. Gill, Assignee of Eph. Doherty.....	On contract.....	528 00

1128	C. Fullmer.....	Labor-machinist.....	7 25
		Total.....	\$10,000 00

## RECEIPTS AND EXPENDITURES.

## RECEIPTS.

From appropriation for support.....	\$49,942 55
From special appropriations from collateral inheritance funds.....	70,000 00
From interest on State endowment.....	12,999 16
From Agricultural and Mechanical fund.....	8,747 04
From the Morrill fund.....	15,234 37
From incidental sources.....	484 94
From students fees and deposits.....	14,402 41
From interest on \$2,000 certificate.....	150 00

Total received.....

\$171,960 47

## EXPENDITURES.

For salaries.....	\$66,353 74
For service and wages.....	8,210 10
For supplies.....	380 57
For heat, light, power and water.....	9,943 99
For equipment.....	117 11
For printing, advertising and stationery.....	2,553 84
For Library books and periodicals.....	1,067 29
Postage.....	790 28
Insurance.....	1,807 10
Freight, express, telegrams, etc.....	1,258 18
General incidental expense.....	4,195 82
Buildings and repairs.....	253 25
Grounds and campus.....	357 55
Student fees and deposits returned.....	3,240 85
For general repairs, under special appropriation, total.....	10,000 00
For laboratory equipment under special appropriation.....	45,000 00
For extending water works and high pressure pump.....	2,000 00
For grading, campus improvements and walks.....	3,000 00
Power, heating and lighting of ore dressing building.....	10,000 00

Total expended.....

\$170,527 77

Total receipts.....

\$171,960 47

Total expenditures as above.....

\$170,527 77

\*Balance chargeable to treasurer of the school.....

1,432 70

\$171,960 47

\$171,960 47

\*This balance is a liability of the school to students on account of contingent deposits, adjustment of which is made at the close of the school year.

## VALUE OF LANDS, BUILDINGS AND EQUIPMENT.

Grounds (26.03 acres).....		\$35,000 00
<b>BUILDINGS.</b>		
Rolla building.....	\$20,000 00	
Chemical laboratory.....	25,000 00

Total.....		\$337,550 00

### UNDER THE APPROPRIATION OF 1905-1906.

nder the appropriation made by the Forty-third General Assembly for equipment of laboratories, for machinery, for new boiler stack, for waterworks, for grading, for gymnasium and for the dressing building, and within the time limit of said appropriation, the Executive Committee ordered that requisitions be issued against said appropriation for the sum of \$9,511.62. Warrants were issued and charged against same as follows:

#### **For Library Books.**

To whom issued.	Purpose.	Amount.
m. H. Guild & Co.....	Books.....	\$230 36
McKee & Buechner.....	Books.....	87 22

#### **For Boilers and Stack.**

eine Safety Boiler Co.....	Boiler and stack.....	\$160 54
avid Morse.....	Labor on boiler and stack.....	21 00
E. Mitchell.....	Labor on boiler and stack.....	4 80

#### **For Water Works.**

Ivesay & Walker.....	Supplies.....	\$39 50
----------------------	---------------	---------

#### **For Grading.**

onsdale Brothers.....	Grading.....	\$80 00
-----------------------	--------------	---------

#### **For Library Equipment.**

ohn Hunter.....	Carpenter work.....	\$67 50
m. Stimson.....	33½ hours painting.....	8 34
ohn Hunter.....	13 days carpenter work.....	32 50

**For Ore Dressing Building.**

9160	Chas. Stuart.....	Labor.....	\$35
9161	C. A. Burdick.....	Labor.....	4
9162	Charles Young.....	Labor.....	14
9171	Lonsdale Brothers, contractors on said building.....	On contract.....	4.72
9172	Lonsdale Brothers, contractors.....	On contract.....	2.70
9173	Howe, Holt & Cutler, architects.....	Services.....	25
9174	Lonsdale Brothers.....	Hardware.....	10
9175	Chas. Stuart.....	Labor.....	5
9403	J. F. Gmelich.....	Error in Warrant 9173.....	4

**For Gymnasium.**

9178	Narragansett Machine Co.....	Gymnasium equipment.....	\$8
		Total.....	\$9.51

**SALARIES PAID BY THE SCHOOL OF MINES AND METALLURGY JANUARY 1, 1909.**

L. E. Young.....	Director of the School and Professor of Mining.....	\$4,44
------------------	---	--------

**Professors.**

George R. Dean.....	Professor of Mathematics.....	\$2.2
A. L. McRae.....	Professor of Physics.....	2.5
V. H. Gottschalk.....	Professor of chemistry.....	2.1
Elmo G. Harris.....	Professor of Civil Engineering.....	2.5
Durward Copeland.....	Professor of Metallurgy and Ore Dressing.....	2.1

**Assistant Professors.**

L. S. Griswold.....	Assistant Professor of Geology.....	\$2.0
J. H. Bowen.....	Assistant Professor of Shop Work and Drawing.....	1.0
L. E. Garrett.....	Assistant Professor of Mathematics.....	1.0
R. C. Thompson.....	Assistant Professor of Chemistry.....	1.0

**Instructors.**

P. J. Wilkins.....	Instructor in Modern Languages.....	\$1.4
J. B. Scott.....	Instructor in English and Secretary of the Faculty.....	1.1
E. S. Smith.....	Instructor in drawing.....	1.1
G. W. Corey.....	Instructor in Mineralogy.....	1.0
Boyd Dudley, Jr.....	Instructor in Metallurgy and Ore Dressing.....	1.0
H. T. Mann.....	Instructor in Metallurgy and Ore Dressing.....	1.0
D. P. Hynes.....	Instructor in Chemistry.....	1.0
Jas. V. Howe.....	Instructor in Civil Engineering.....	1.0

**Assistants.**

<b>Item issued.</b>	<b>Purpose.</b>	<b>Amount.</b>
erson.....	Assistant in Metallurgy.....	\$150 00
.....	Assistant in Mineralogy.....	225 00
.....	Assistant in Surveying.....	150 00
.....	Assistant in Surveying.....	150 00
.....	Assistant in Chemistry.....	150 00
.....	Assistant in Physics.....	225 00
er.....	Assistant in Drawing.....	225 00
on.....	In charge of Gymnastics and Equipment.....	500 00

**Other Officers and Employes.**

ergue, Jr.....	Secretary of the Executive Committee and Registrar.	\$1,200 00
wn.....	Treasurer.....	150 00
e.....	General Attorney for collection of the Collateral Inheritance Tax (one-fifth) .....	400 00
rrison.....	Attorney for the collection of the Collateral Inheritance Tax (one-fifth) .....	120 00
ckerson.....	Inspector of Schools (one-fifth).....	480 00
